# ABOUT US

Hi Dev Mobile Inc. (Hi Dev) collaborates closely with clients at any stage of their product development.

From pitch decks, to prototypes, to full production, we help our clients build a strong brand image and champion a full UI and UX design process before we develop; unless the design is provided by the client.

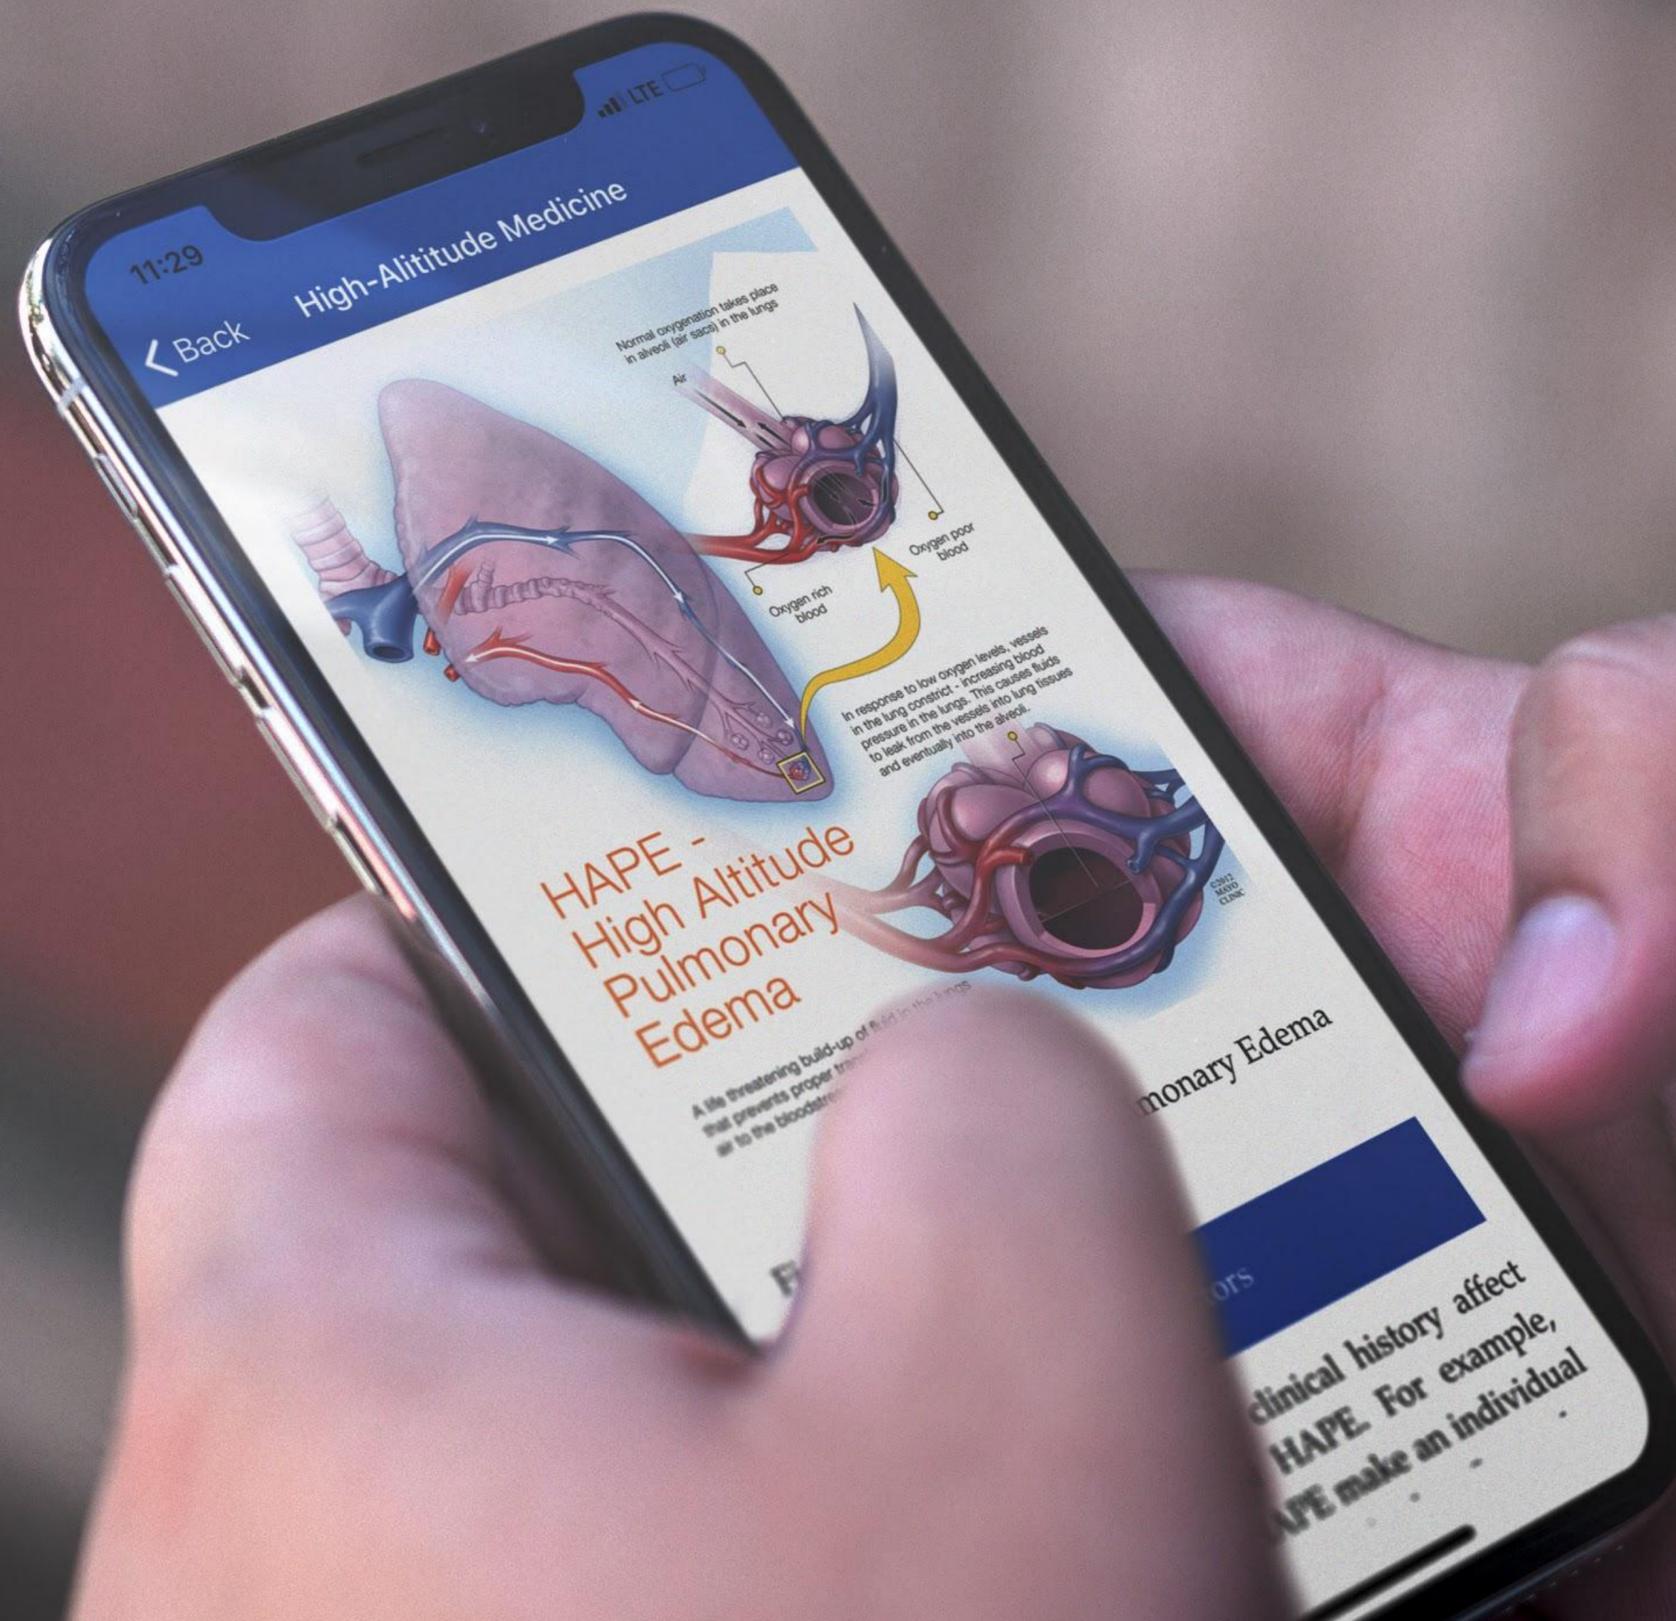

We design and develop mobile applications and websites from start to finish, and we provide services to enhance existing product designs to help our clients reach their milestones and product goals.

We are highly experienced with most coding languages, tools, technologies, integrations and cloud services (if we aren't we learn them fast).

# Medicine at the Extreme

Hi Dev partnered with Mayo Clinic and three of their top doctors to develop an iOS app with invaluable information.

# How it works?

The app can be accessed in any environment, worldwide & even in space! It's an e-book that scientists, doctors, astronauts and adventurous people can utilize in harsh environments.

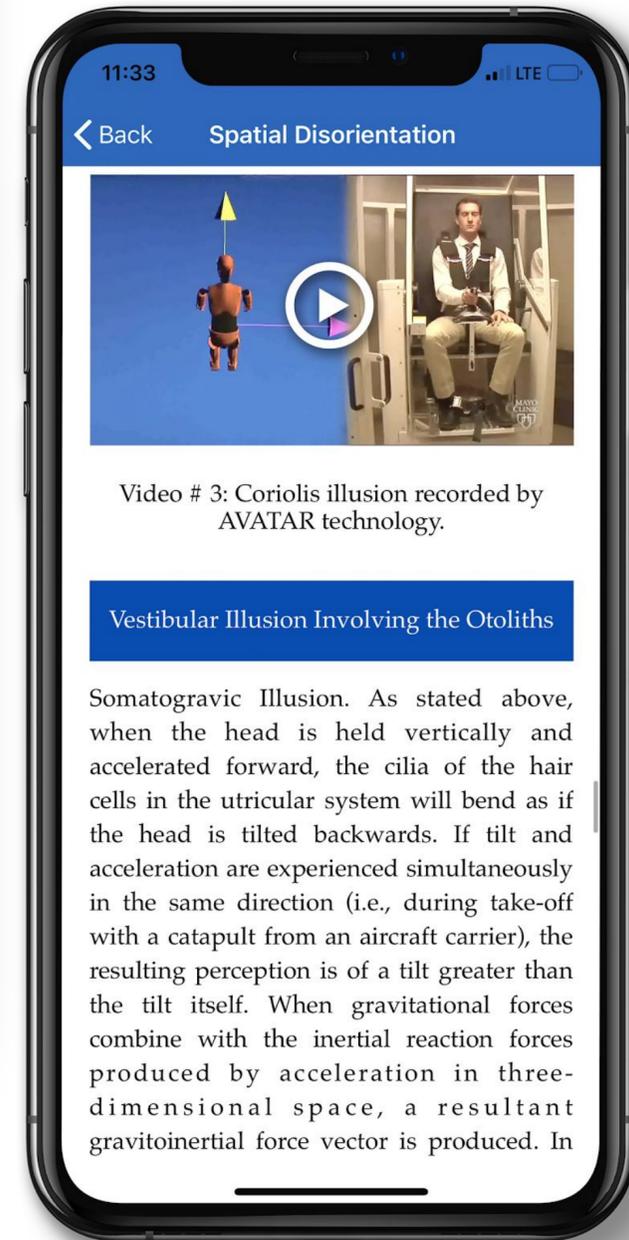

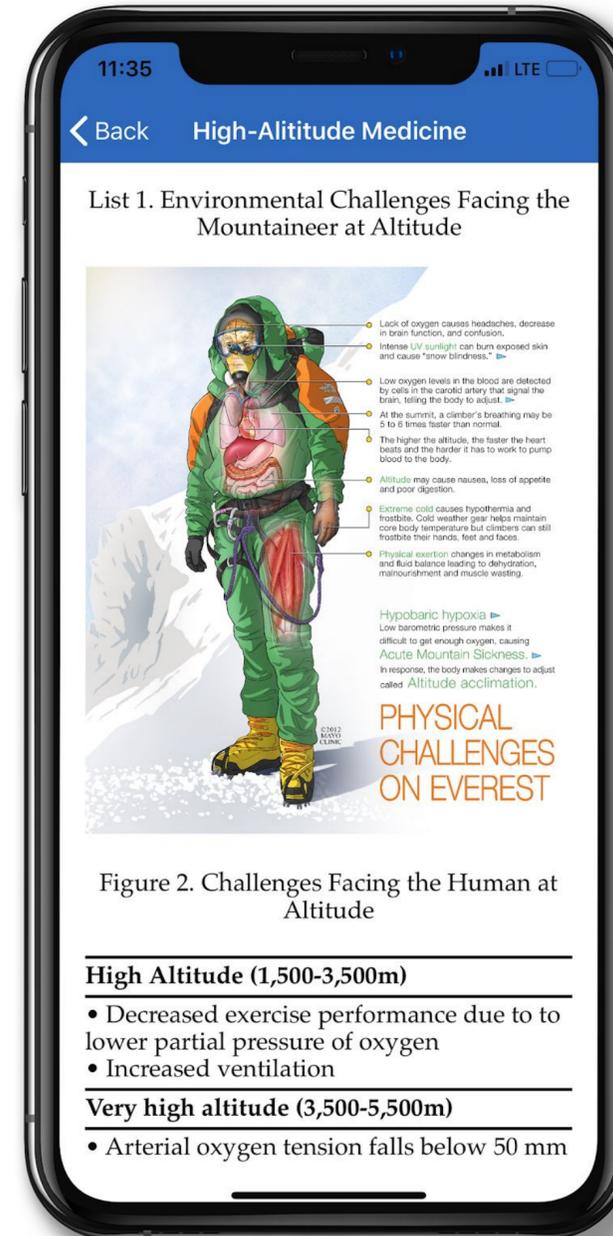

# Features

## No Wifi or Service Required

Access information, that can help save your life, right from your mobile device.

## Proprietary Content

All content including text, images, videos and media are produced and provided by Mayo Clinic.

Custom Kiosk Apps  
in partnership with

**Verifone**<sup>®</sup>

# We design and build Kiosk apps across all the Verifone devices

# Custom Design and Development

Hi Dev is in partnership with Verifone developing custom kiosk applications for their customers.

We built one of the first kiosk prototypes for Chik-Fil-A.

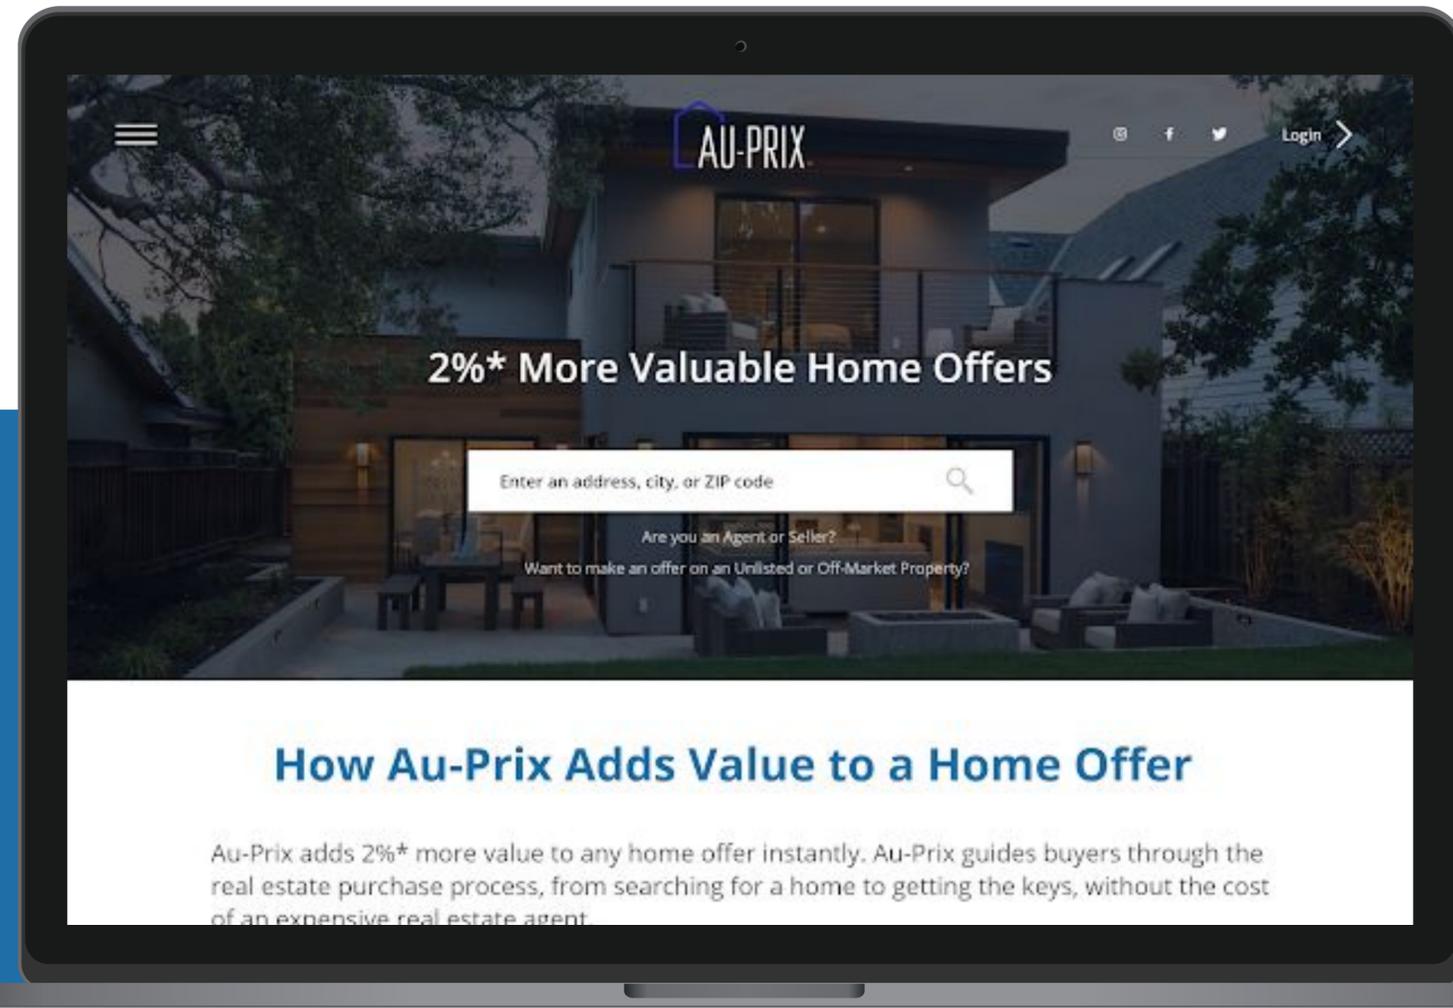

Our team designs the UI/UX and builds the applications, which are either Android or Microsoft based. Request to see our demo.

# Au-Prix

In partnership with Au-Prix, we built a website that allows home buyers to buy a house online without a real estate agent, thus saving users 2% on average.

### Step 1

#### Find Your Dream Home

Use Au-Prix to search for your dream home from anywhere. Connect directly with the seller's agent, schedule private tours, and request property details with the click of a button.

### Step 2

#### Use Au-Prix to Create your Offer

Answer simple questions to create your custom real estate offer. Upload any necessary documents and then sign your offer using DocuSign.

### Step 3

#### Submit and Track your Offer

Electronically submit your signed offer directly to the seller's agent. Au-Prix then guides you through negotiations by allowing you to create counteroffers until all terms are just right.

If your offer is accepted, Au-Prix walks you through the entire escrow process providing digital tools and step-by-step guides for nearly any scenario.

# How it works

## Search

Search for homes and schedule private tours

## Submit

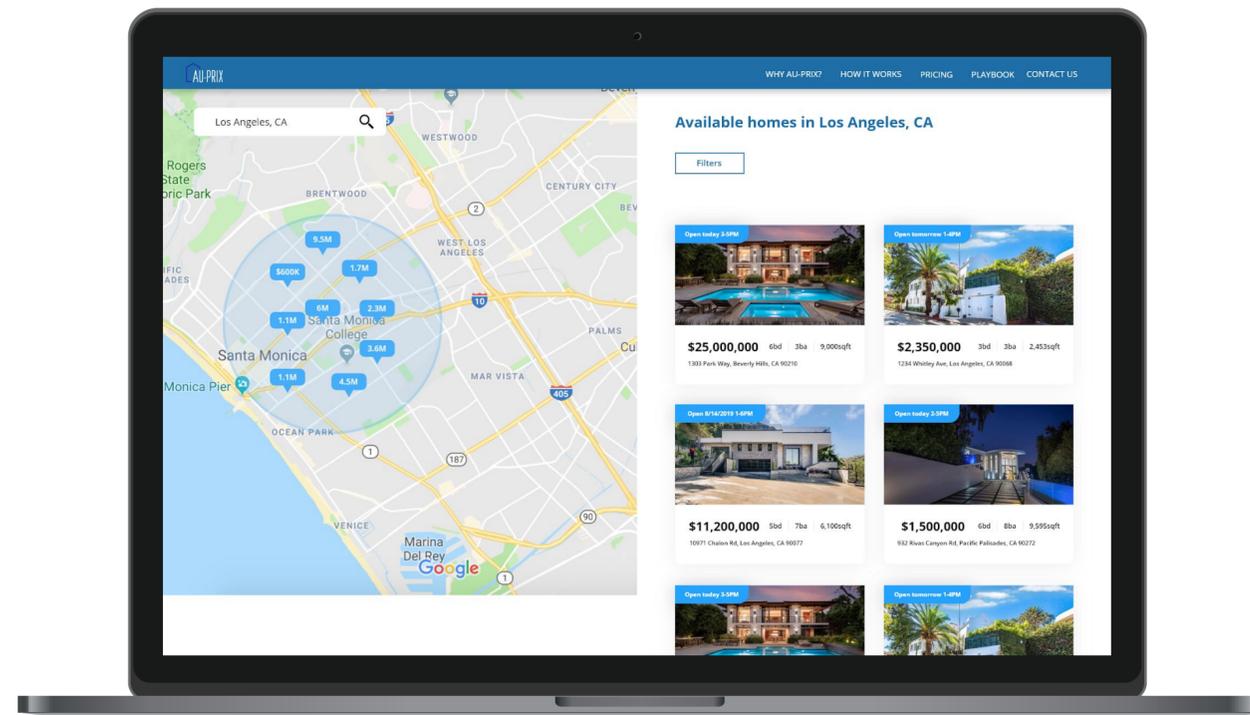

Create and submit an offer right from your browser

## Track

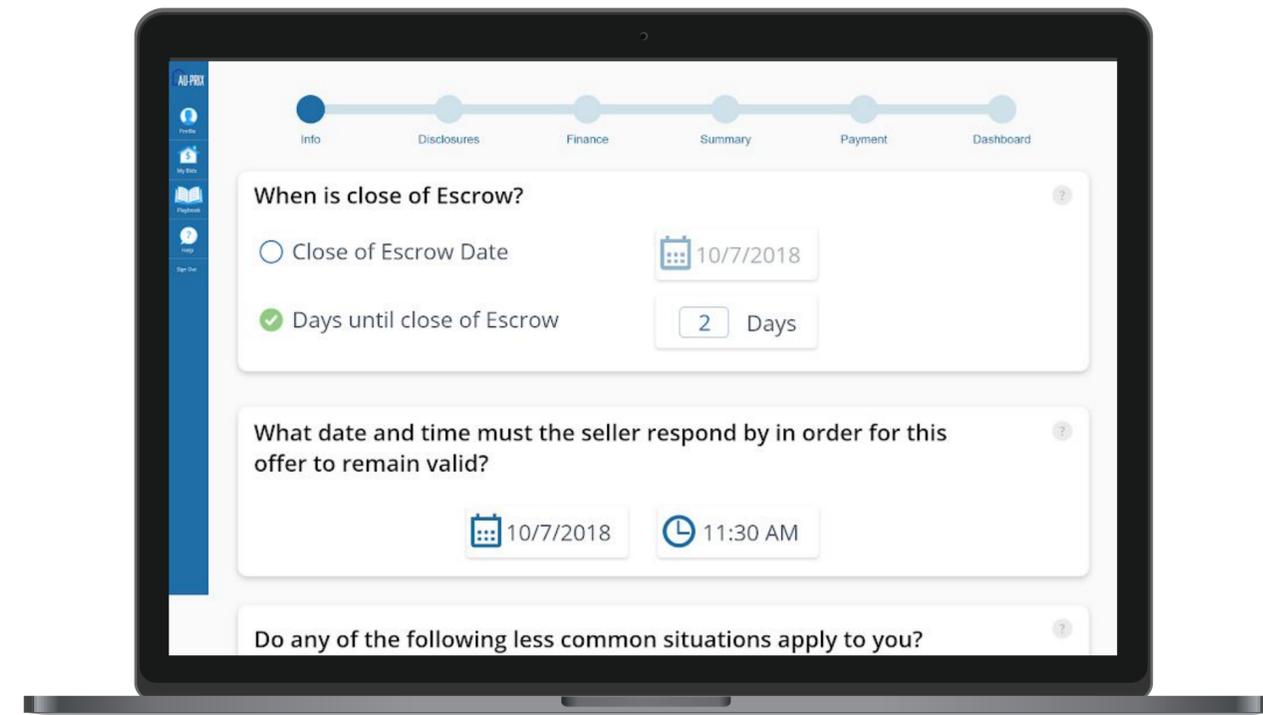

Track your process through a variety of custom built tools

# Features

Browse for properties with a robust search engine

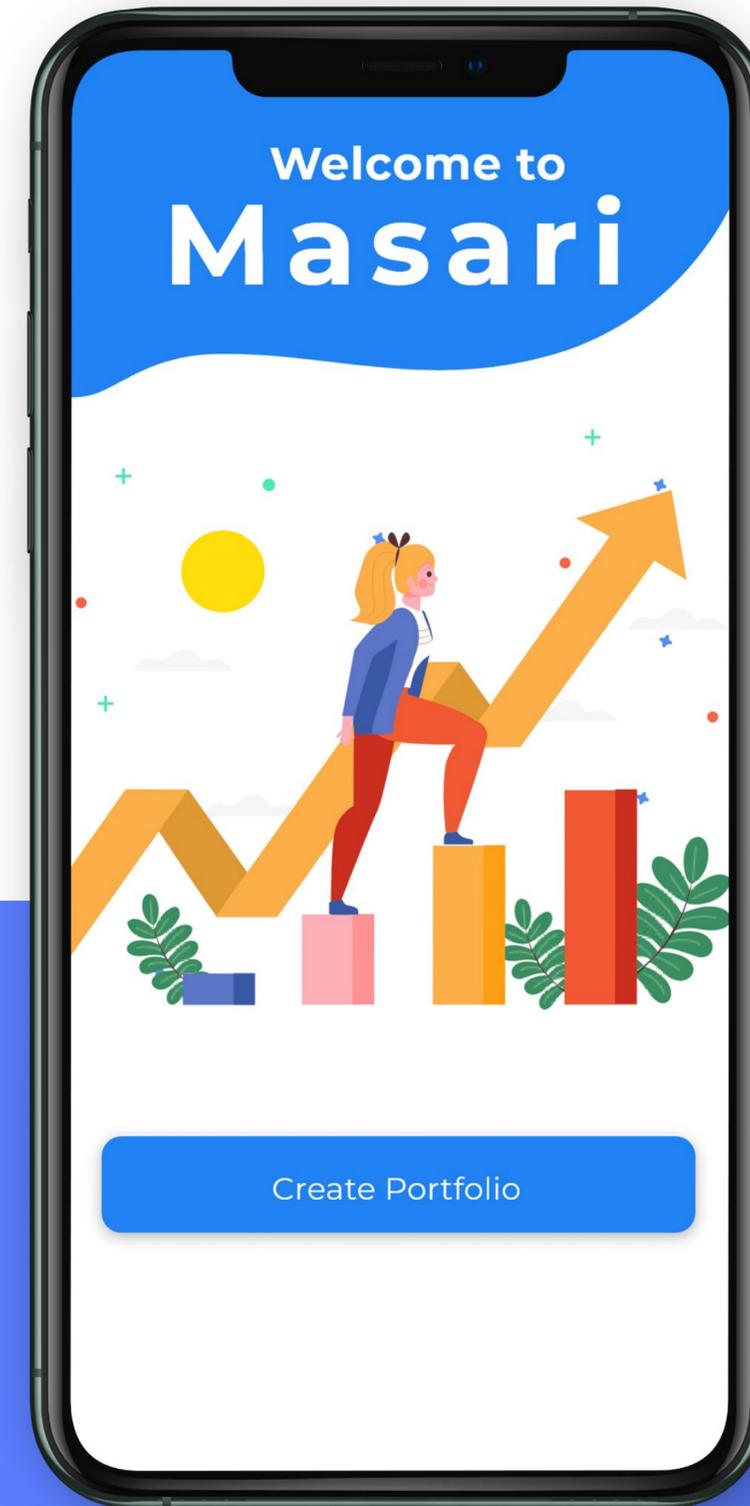

Simplify the purchase process with step by step guidance

Hi Dev is partners with CRMLS and we have successfully integrated MLS systems into websites like Au-Prix. All contracts in Au-Prix are integrated with DocuSign for secure, credible and safe e-signatures.

# Masari

Built from the ground up by Hi Dev, Masari redefines financial planning by allowing users to send gift funds directly into a recipient's investment portfolio. Masari provides users with the ability to create various portfolio types with guaranteed returns.

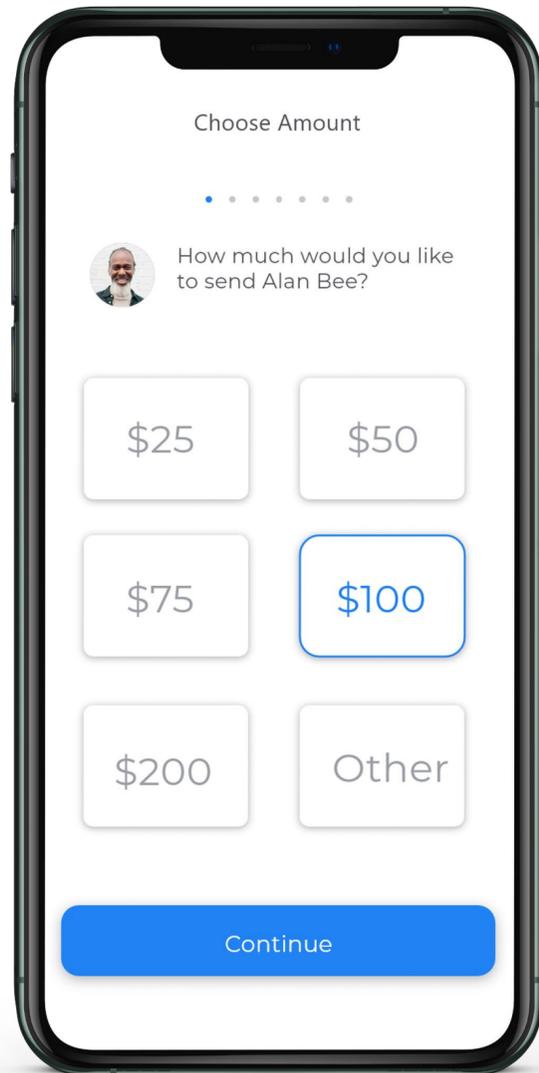

# How it works

- Create your investment portfolio from a set of predetermined plans best suited for your needs
- Select a recipient on Masari to send a gift to.
- Choose from a one-time deposit or gift or set up recurring schedule for easy investing

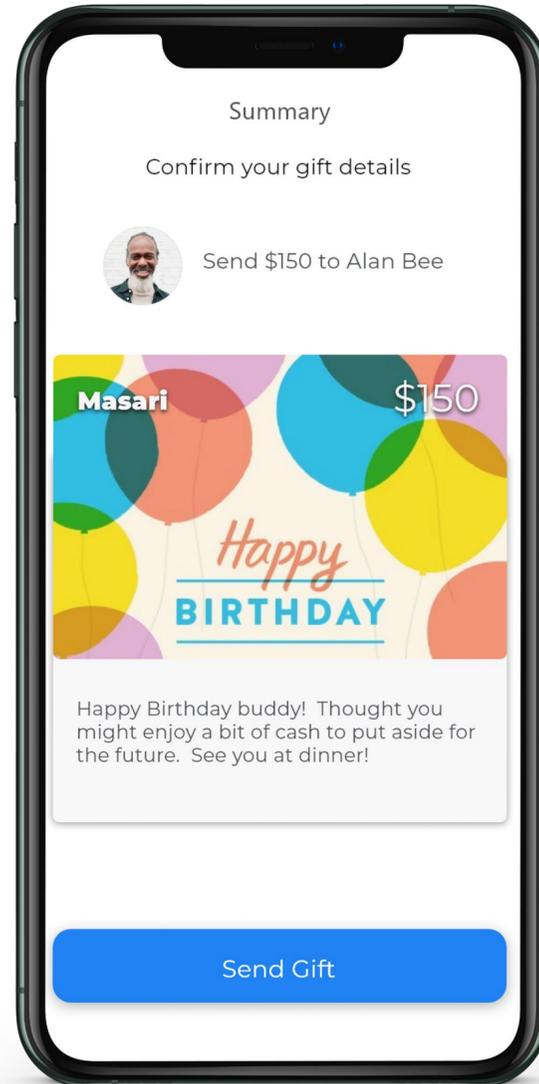

# Features

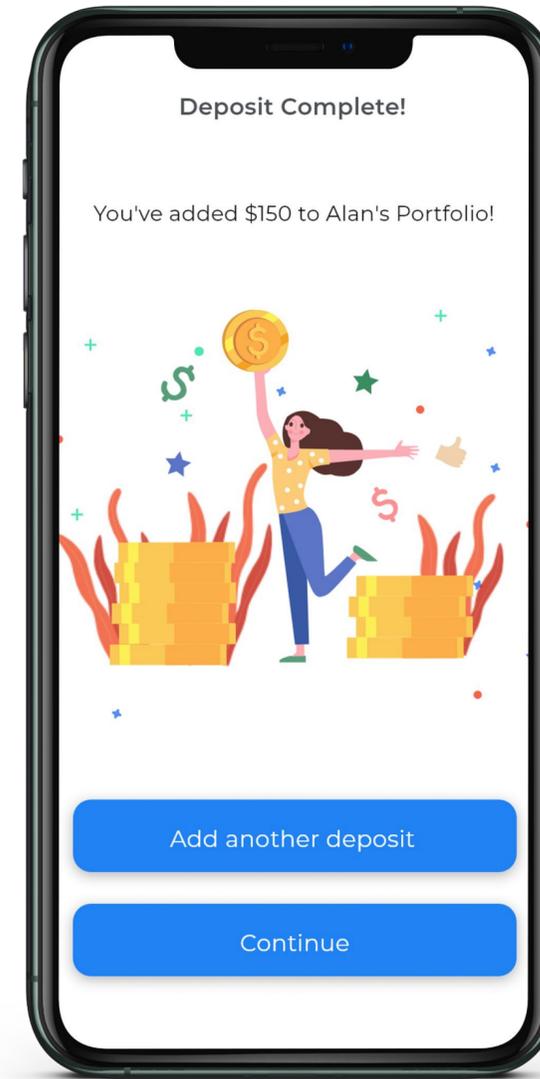

## Send

Send a gift instantly

## Customize

Choose a unique gift template

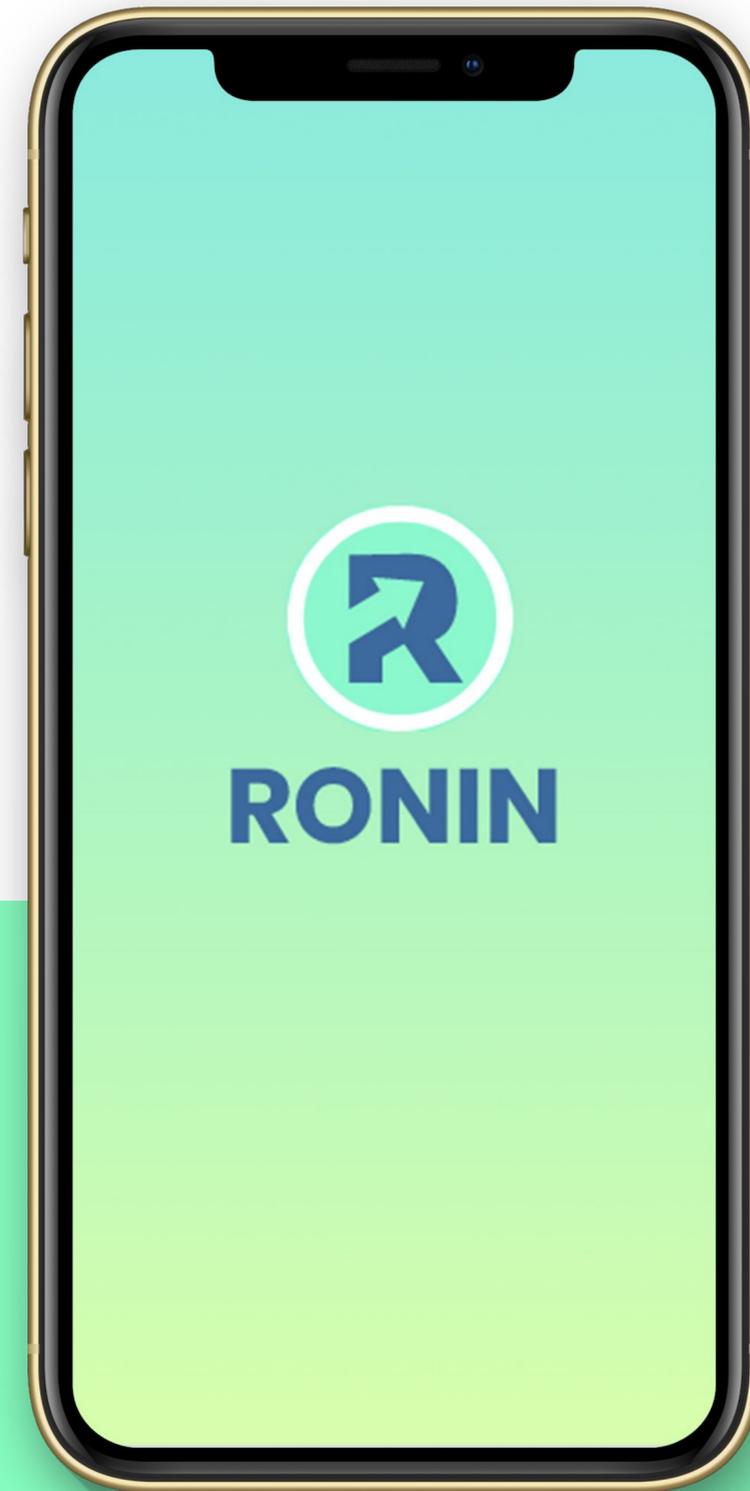

## Gift

Build a strong financial future

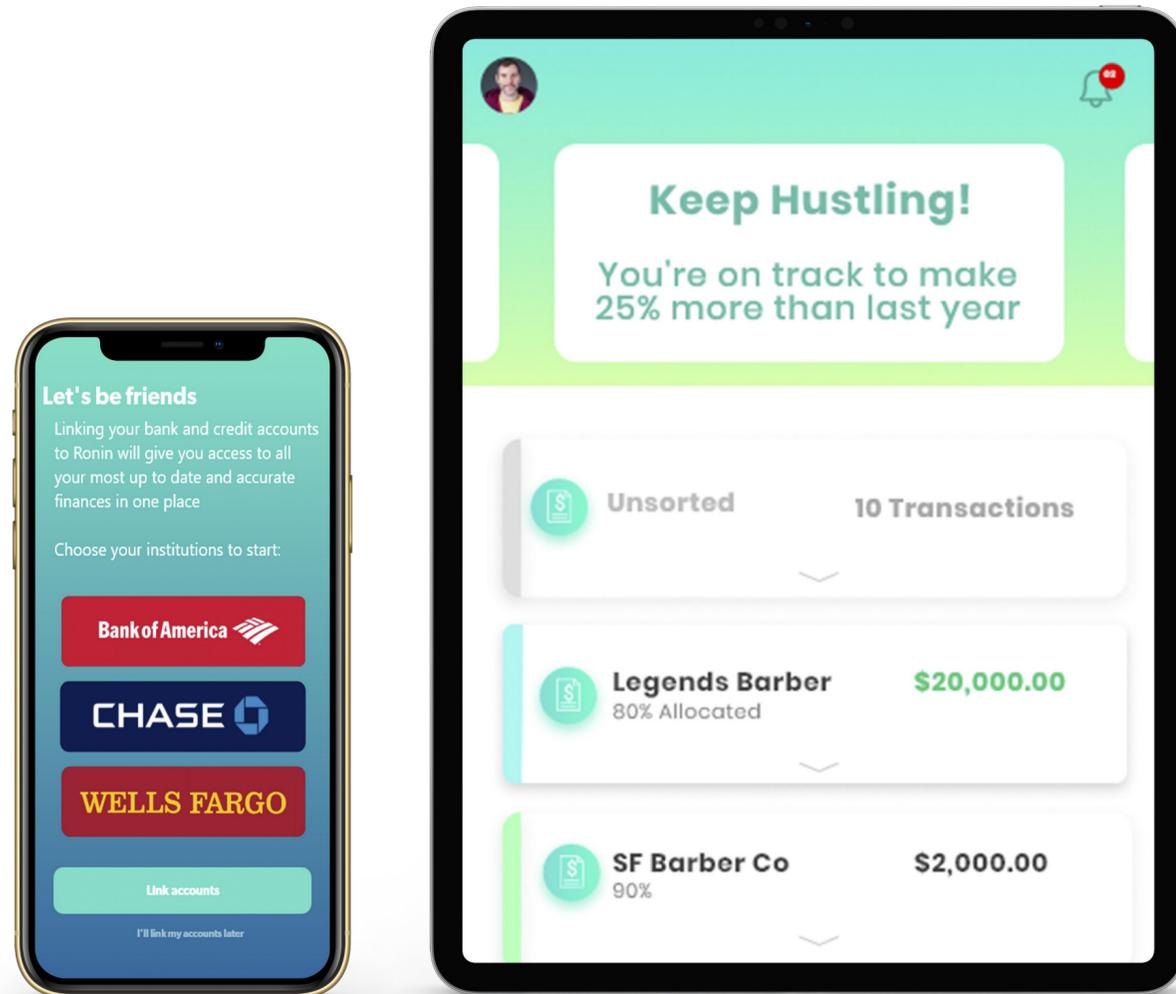

# Ronin

Hi Dev designed the logo, brand and UI/UX and then built the iOS app. Ronin allows independent contractors to log their income and automate their tax savings.

# How it works?

Hi Dev has successfully integrated Plaid (Visa) & Dwolla

## Sync Bank Accounts

Sync your bank accounts with Ronin for a flawless income and expense tracking experience

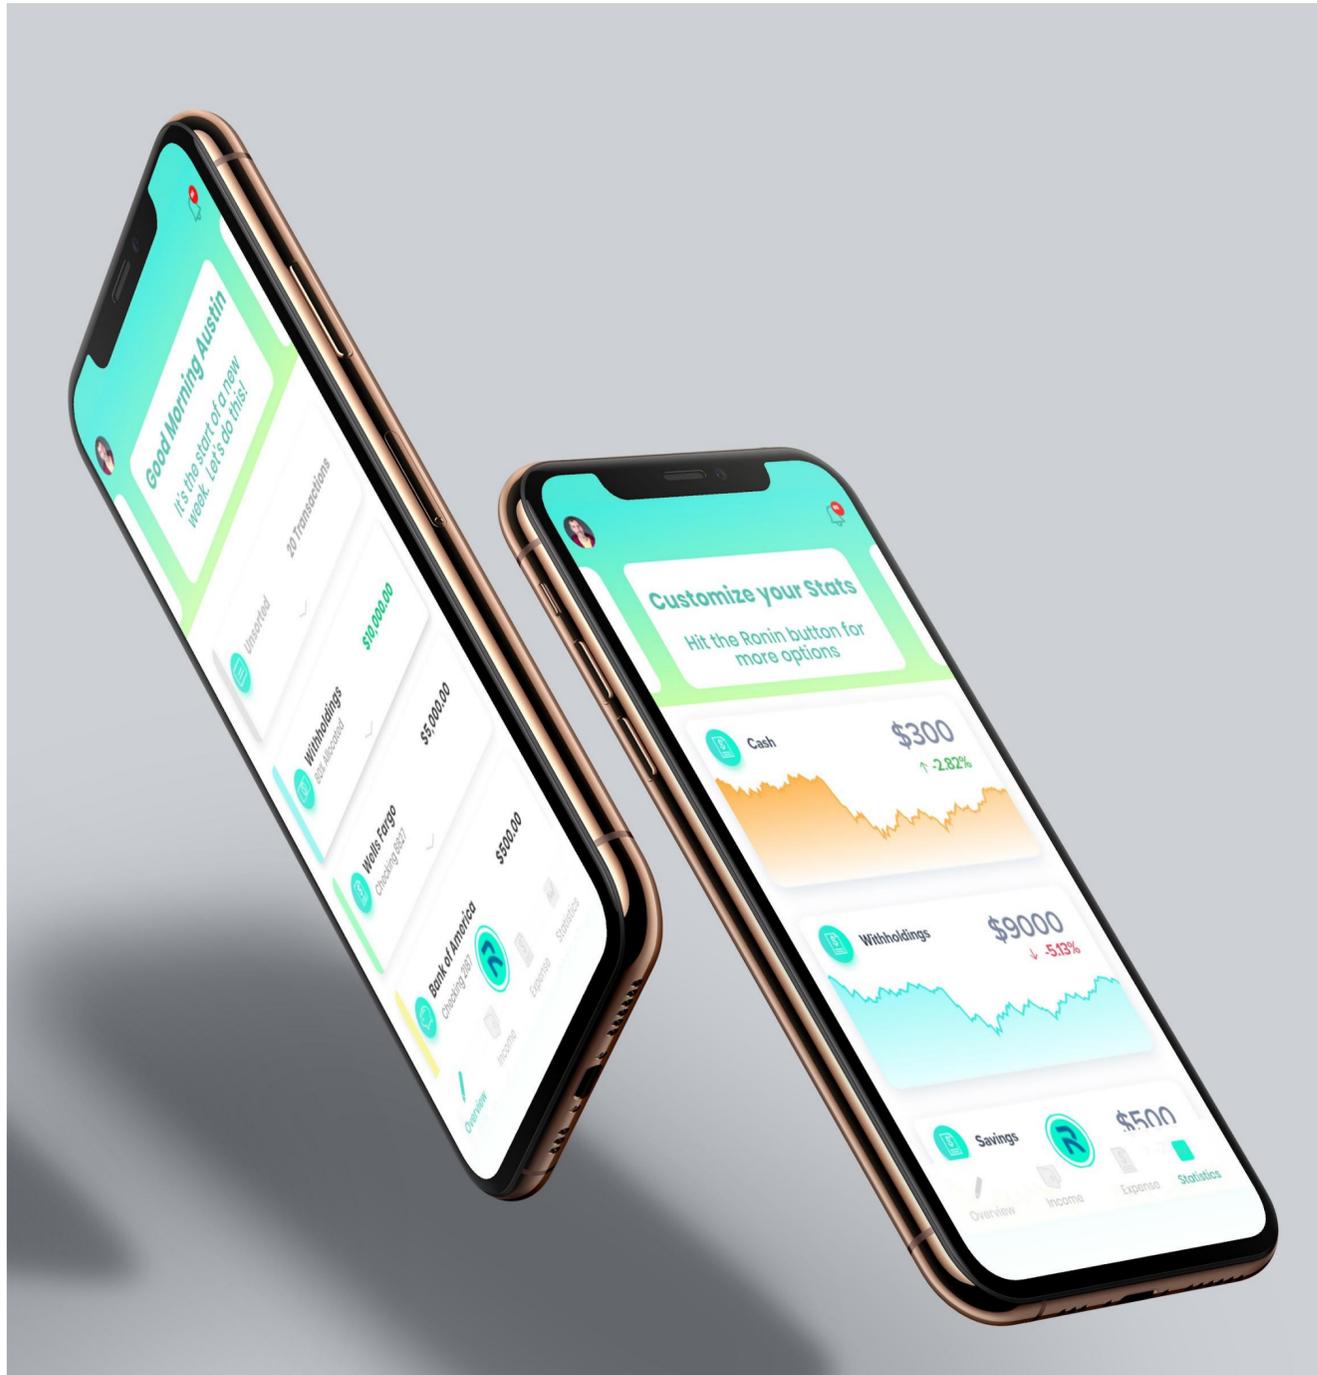

## Create Custom Accounts

Create separate “buckets” to track income and ensure that savings are going to the right places

## Export Tax Forms

Pregenerated tax forms are created from data automatically and ready to deliver to an accountant

# Features

## Feature 1

### Create Custom “Buckets”

“Buckets” act as custom accounts that allow users to categorize their savings in detail

## Feature 2

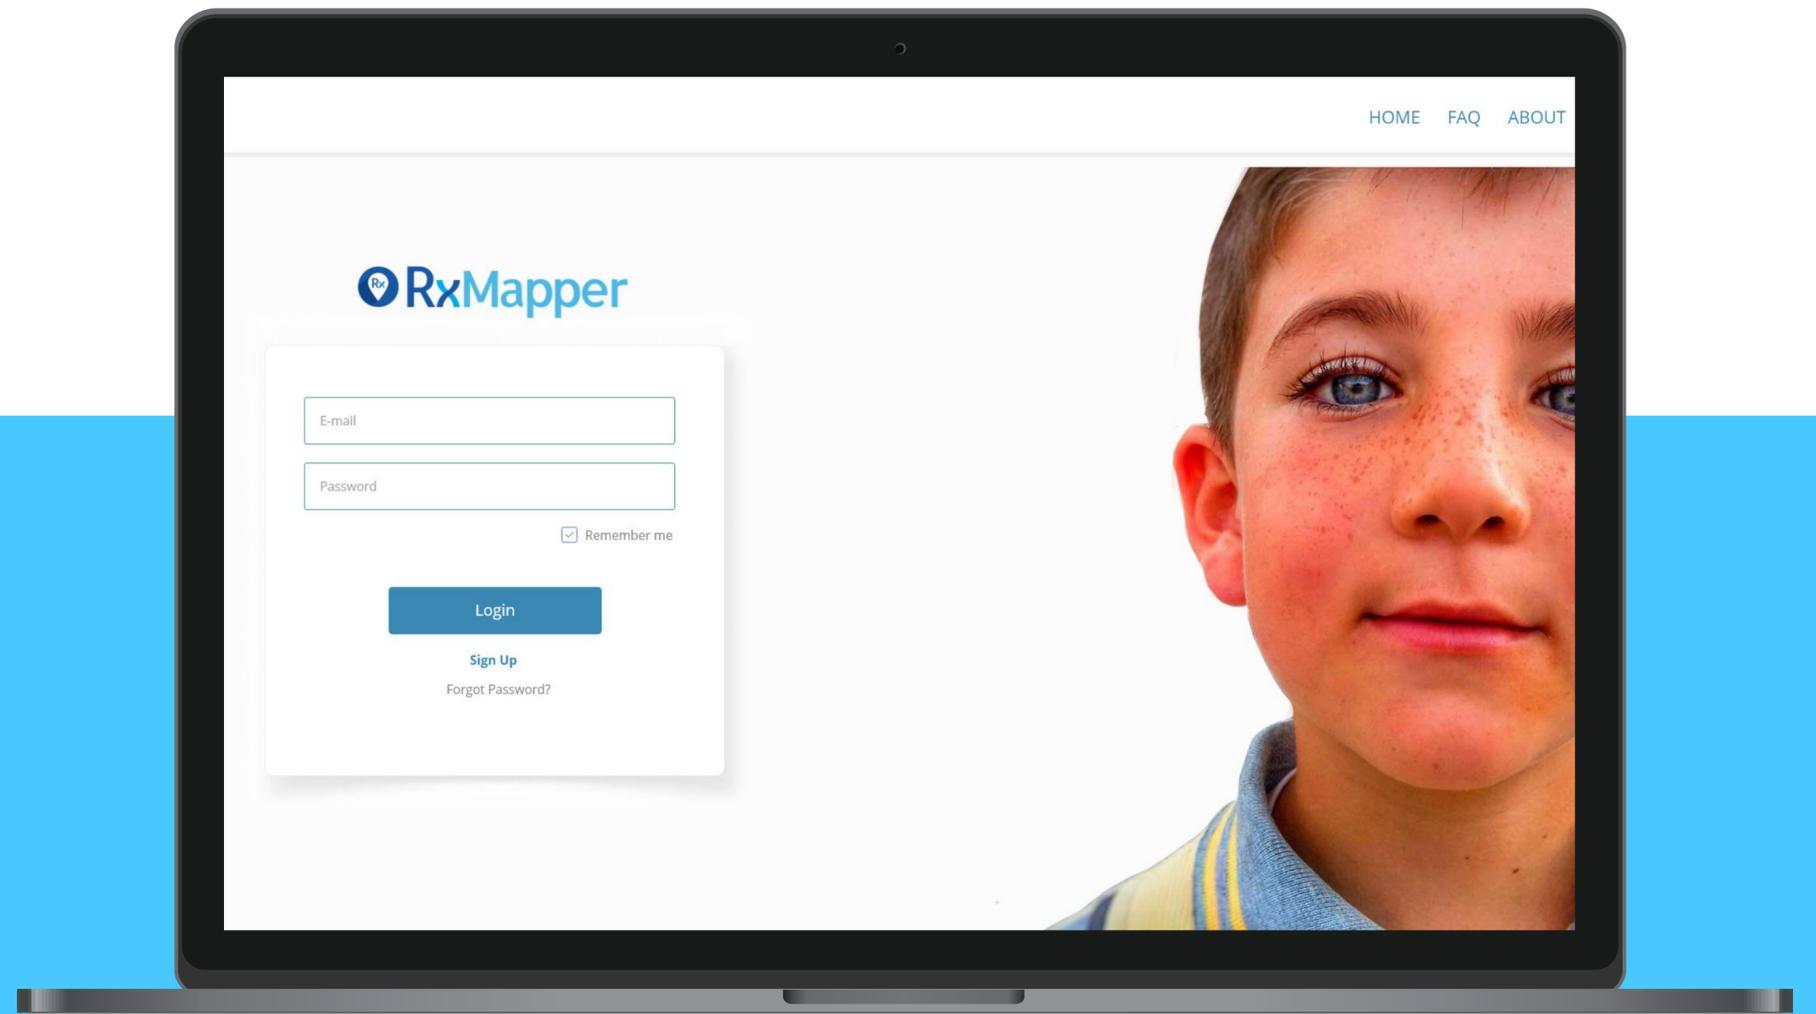

### Finance Tracker

View finances in multiple graphs and charts to make the information easily digestible at a glance

# RxMapper

RxMapper & Mayo Clinic partnered with Hi Dev to design the logo, UI/UX and build a website that gives users the ability to predict adverse drug effects based on their own DNA (Genomics).

# How it works?

## Order a Kit

Users order a test kit through the RxMapper website and are able to send their DNA samples back for testing.

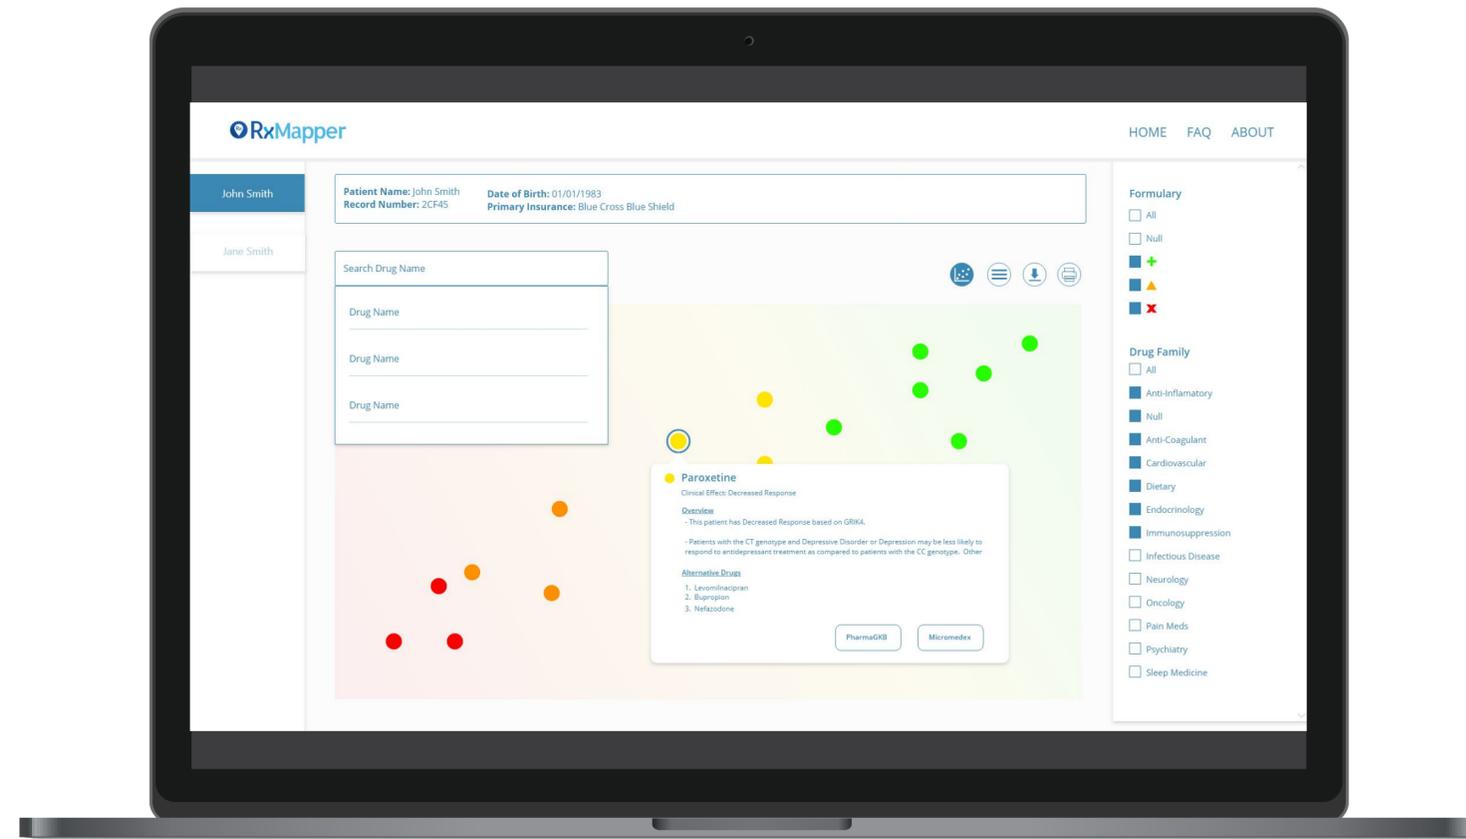

After receiving results, their data is visualized on a custom and interactable graph, which we designed and built.

Package & Branding Designed by Hi Dev

# Features

## Dynamic Data

Data and plot points update based on user's selections

## Visualization

Easy to digest visualization of genomic information

## Filter

Choose specific drug types and filter custom preferences

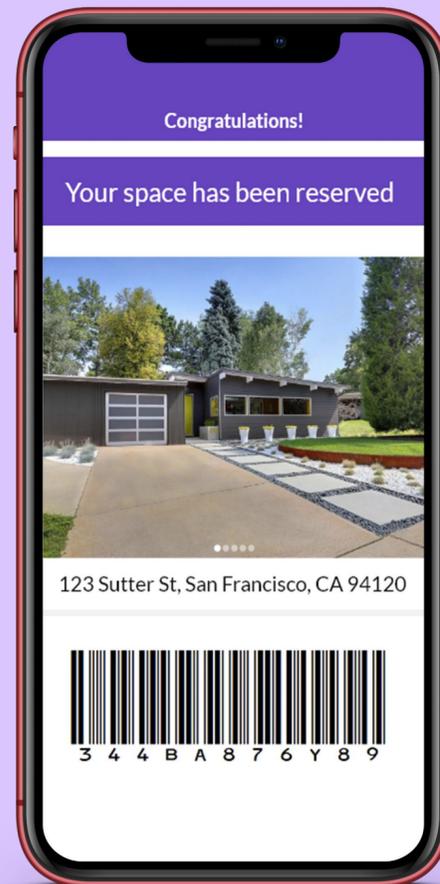

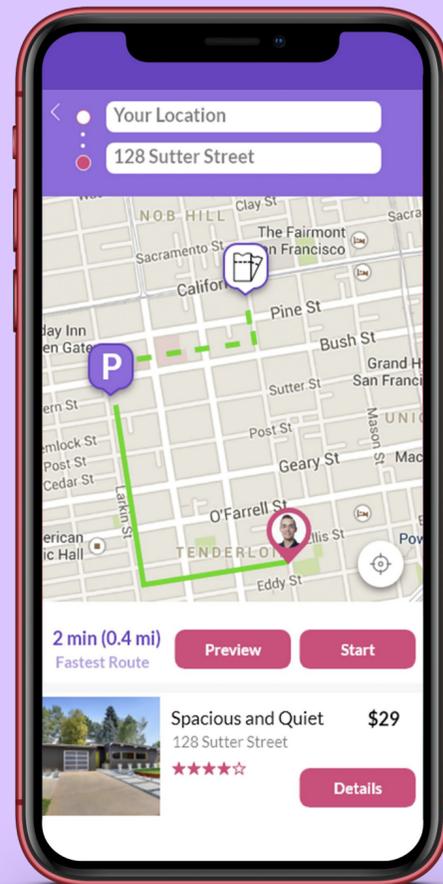

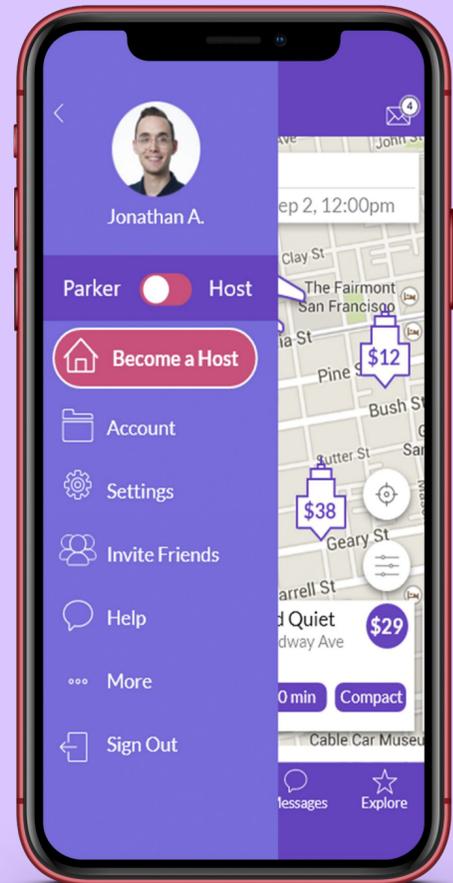

# SpotWayz

The “AirBnB for driveways.” Hi Dev designed the logo, brand, UI/UX and built a prototype. SpotWayz opens up a new market for renting out driveways and open parking spots in private lots & residential properties.

# How it works?

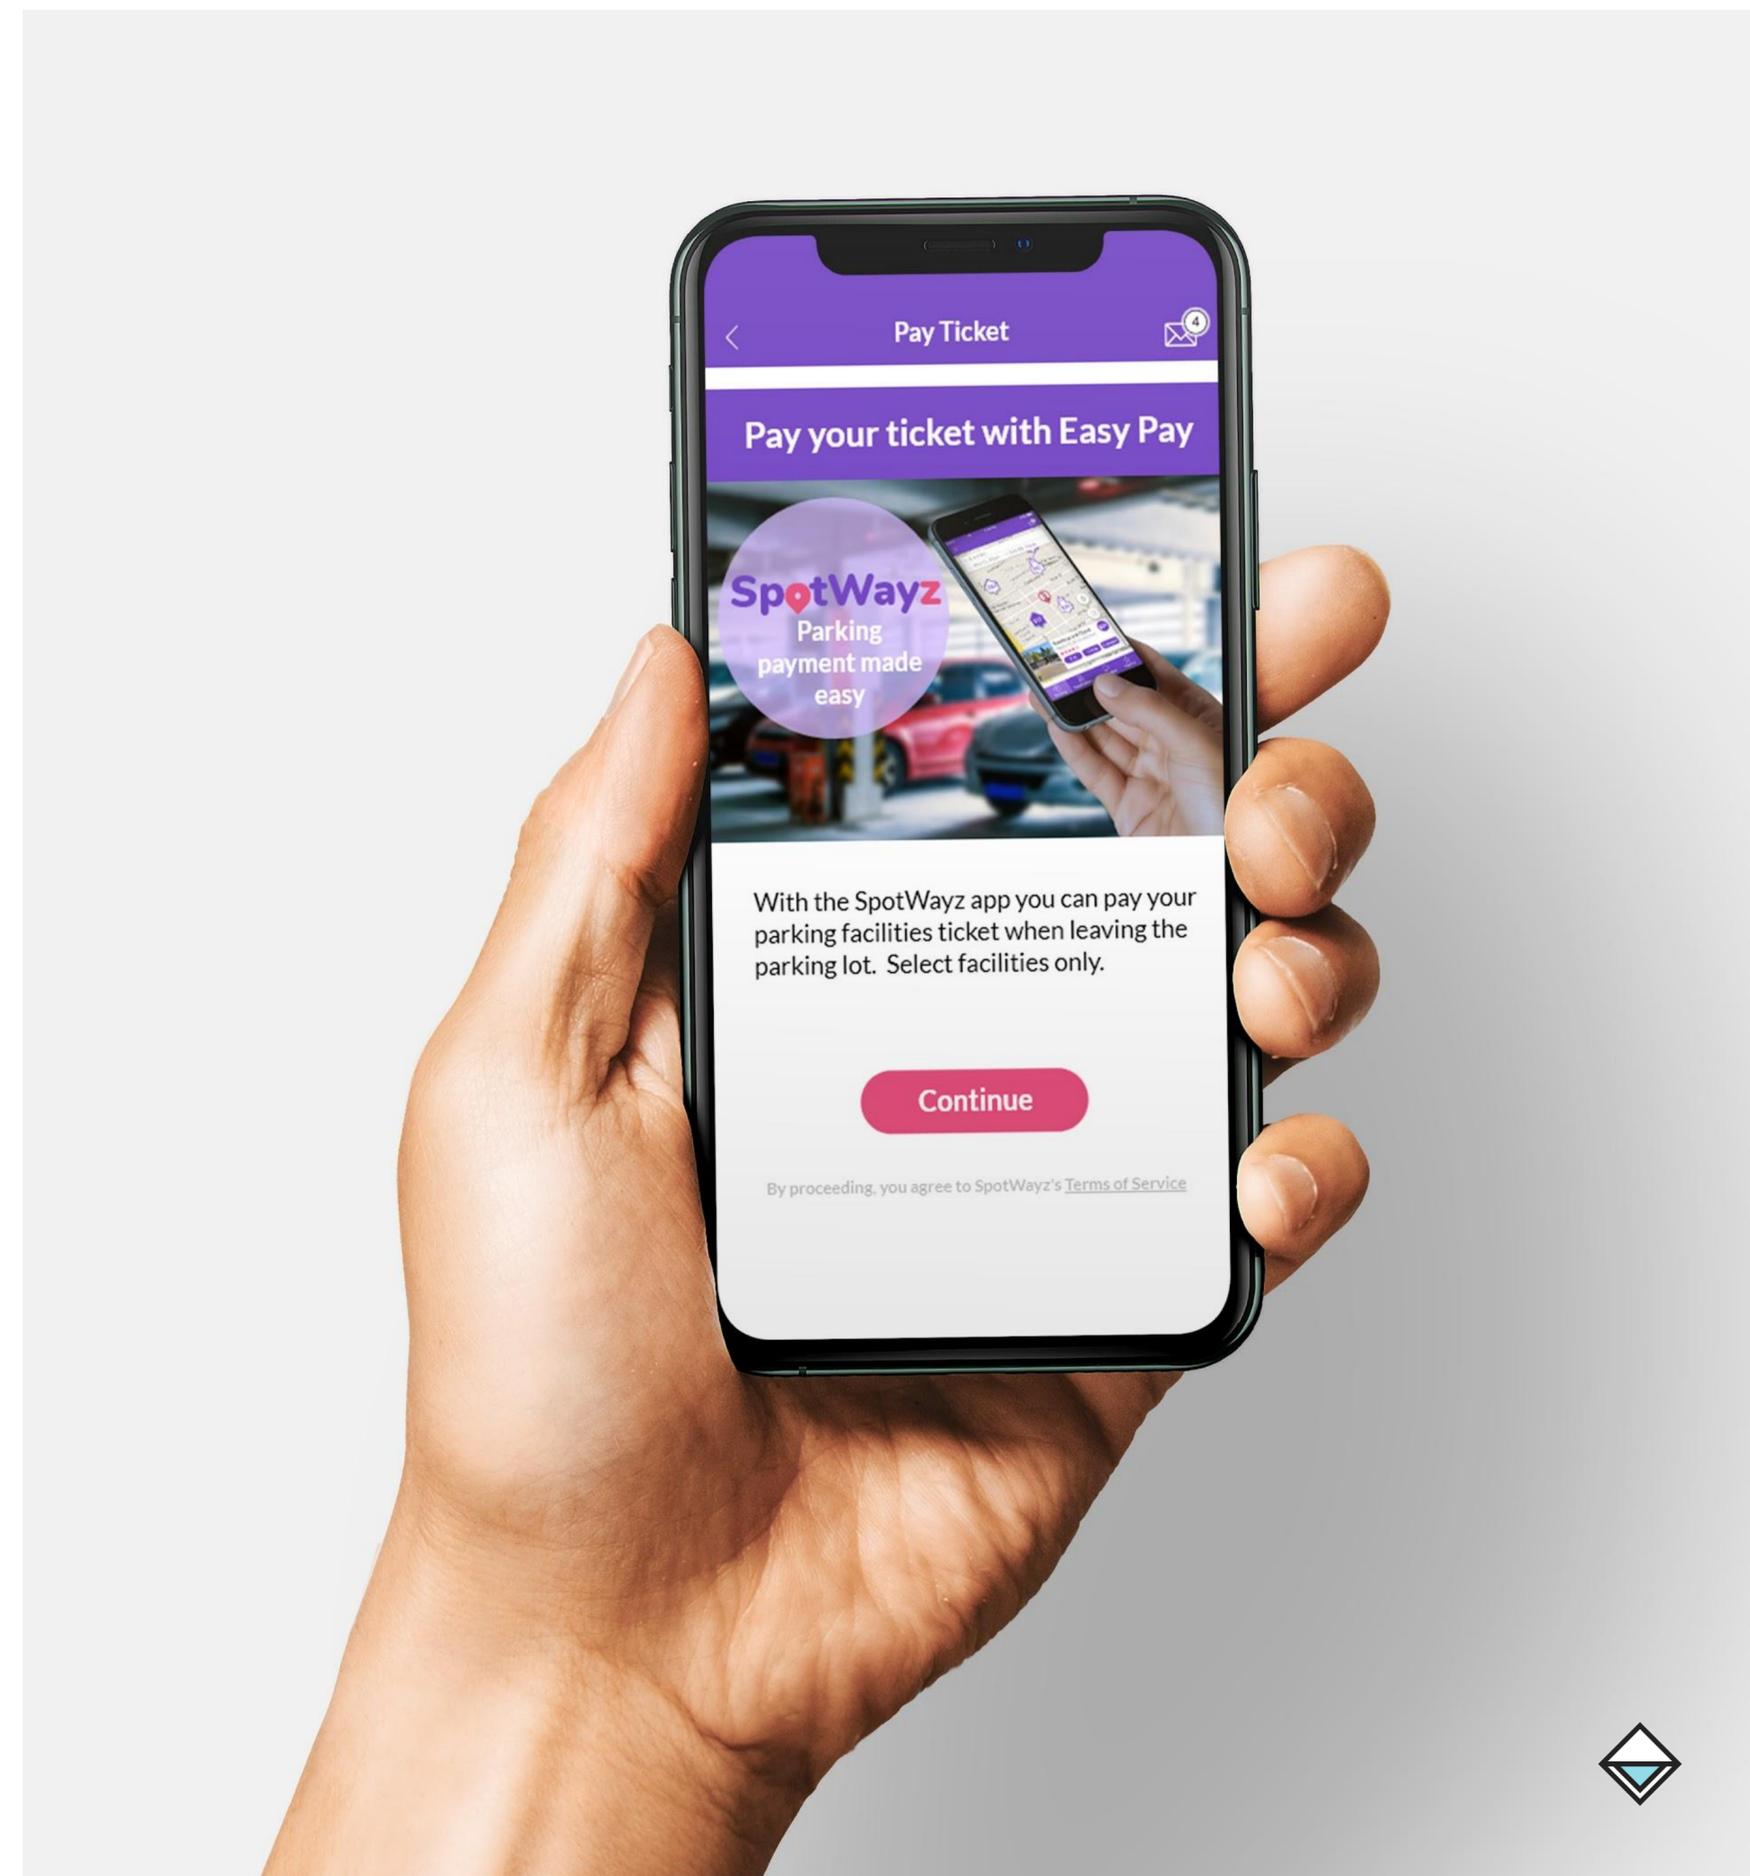

Users have the ability to host an empty driveway spot on their property and place it out for rent. Patrons of the app can rent spaces ahead of time to save time looking for spaces in busy areas

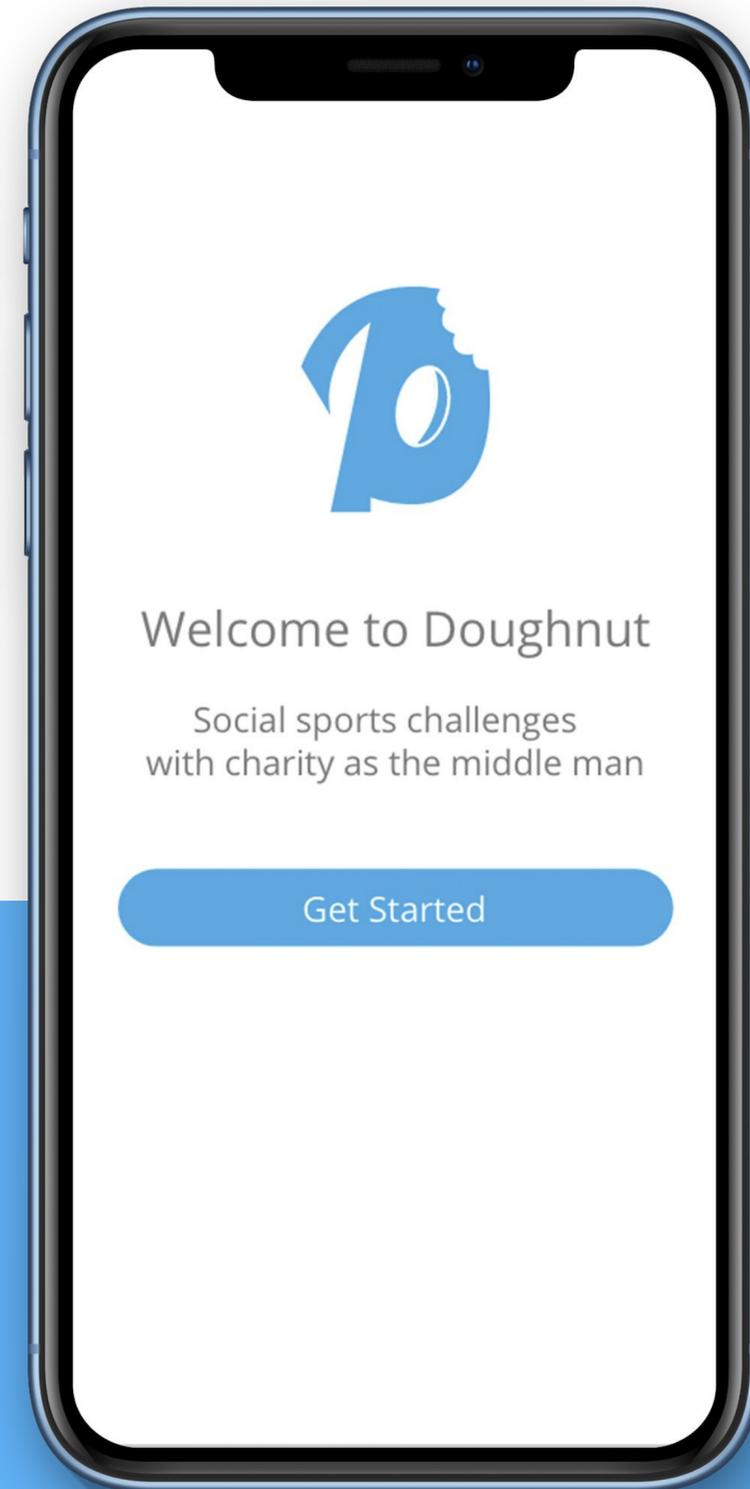

# Easy Pay

Easy Pay is a custom payment system that allows users to pay for parking facilities right from their mobile device

# Doughnut

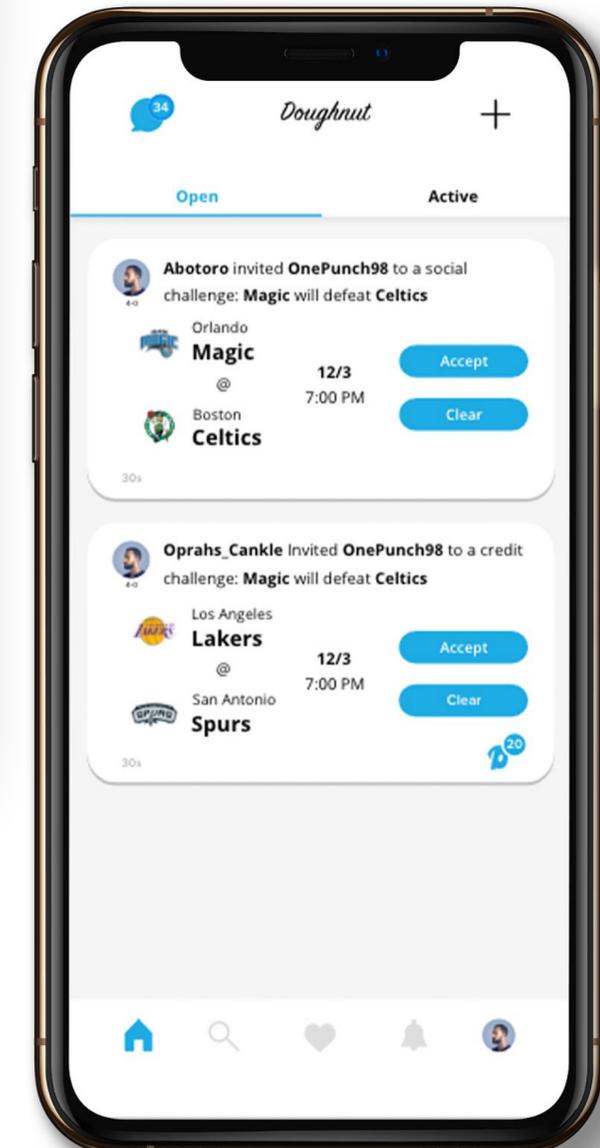

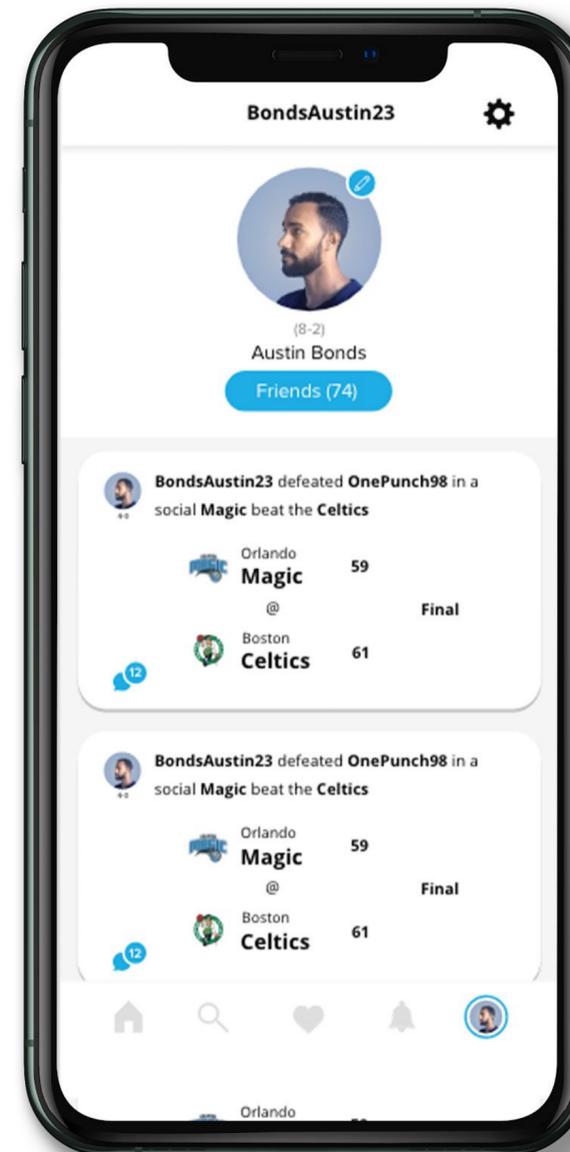

Hi Dev designed the logo, brand and UI/UX. We built both the iOS and Android app using Microsoft's Xamarin. The platform utilizes many API calls and can handle hundreds of thousands of users since we are using AWS on the back-end.

# How it works?

Users can challenge their friends by choosing the team who is going to win the live game. Who ever wins the game also wins (takes) the other persons Doughnuts. Doughnuts can the be redeemed for gift cards and donations to charities.

# Features

## Real-Time Game Feed

We integrated with multiple sport feed APIs to pull real-time games and present them on the app.

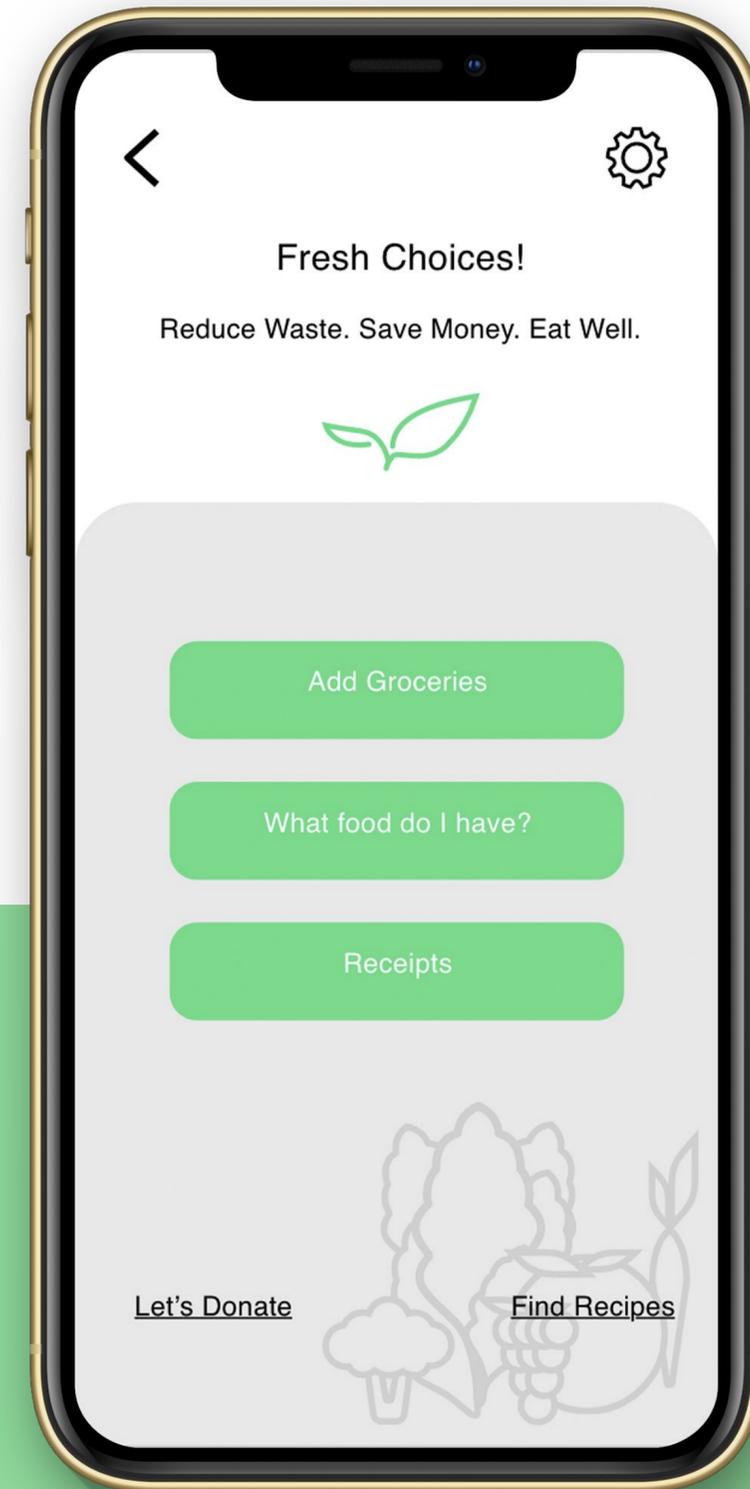

## Peer to Peer Challenging

Live social interaction between users during the game. A new experience to enjoy with friends while watching the game.

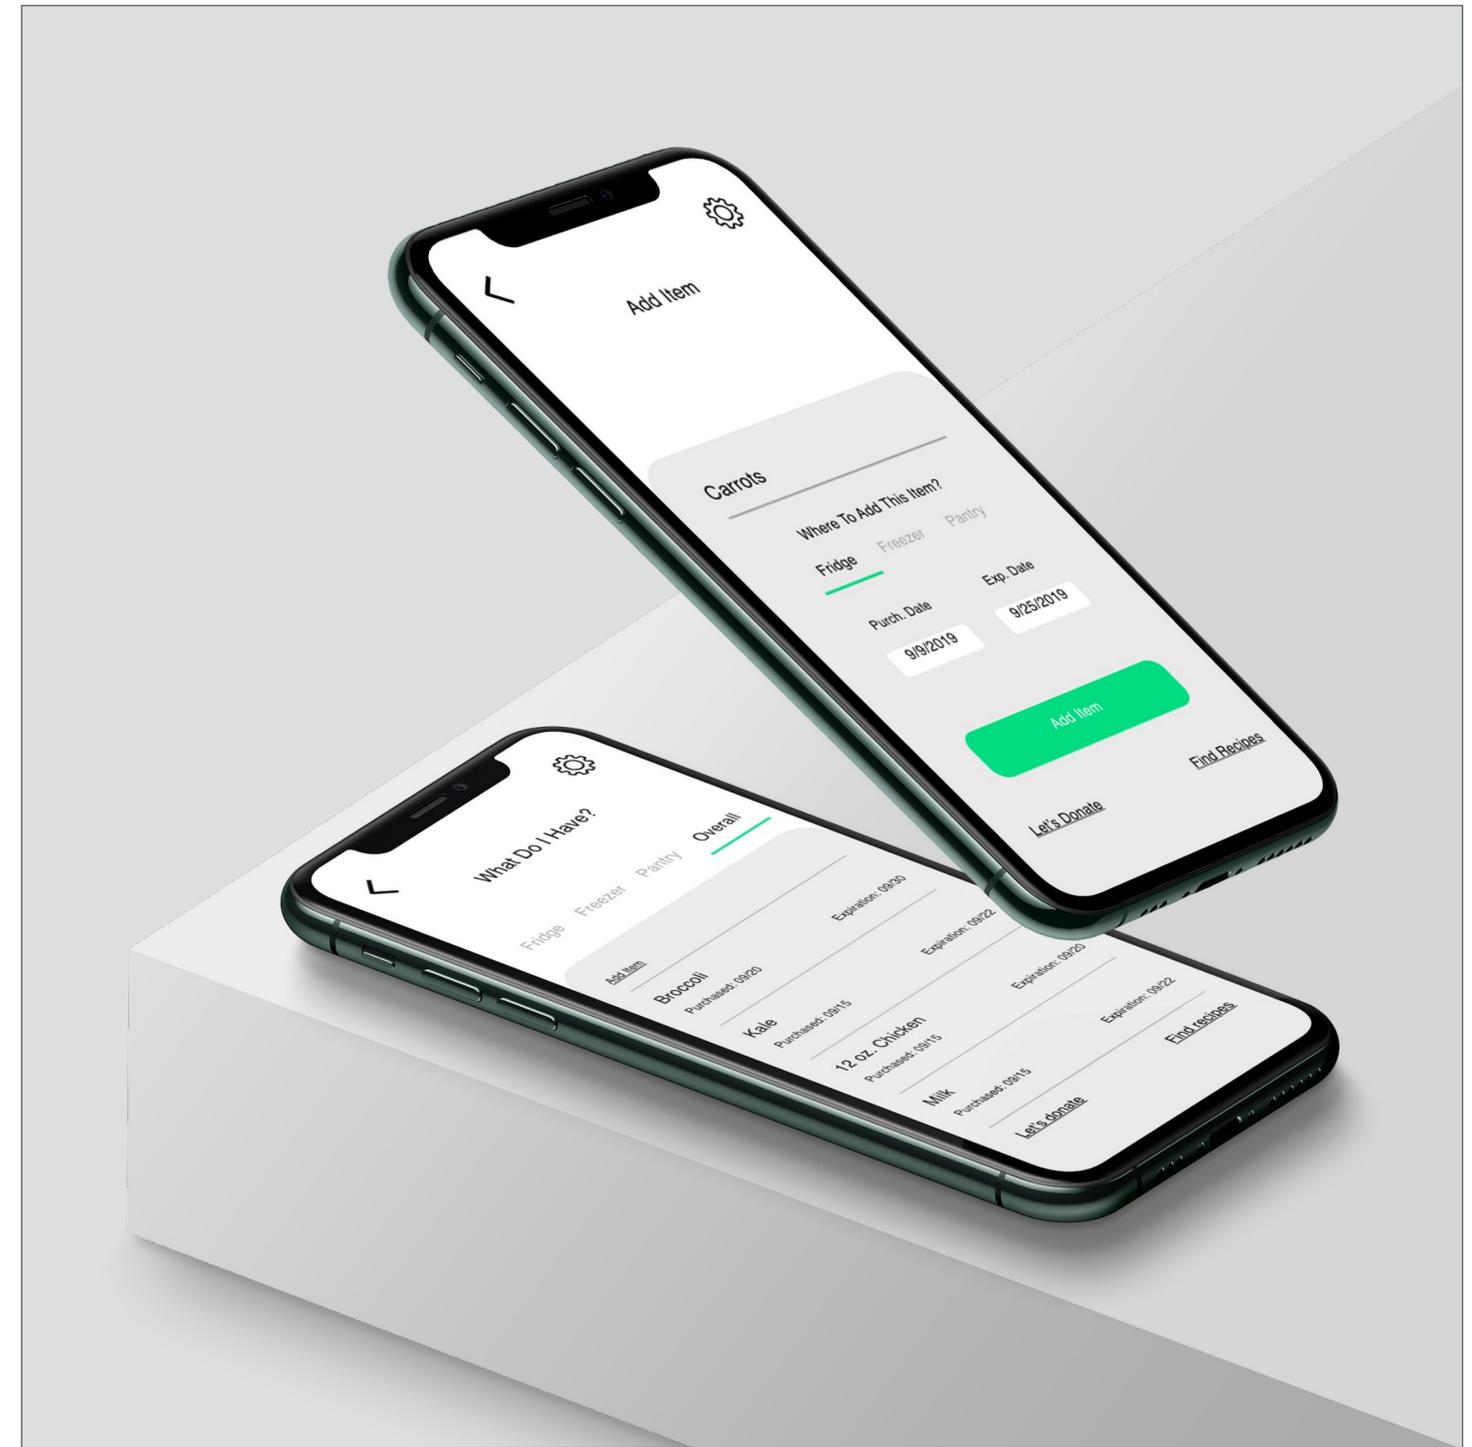

# Fresh Choices

Hi Dev designed the logo, brand and UI/UX. We built both the iOS and Android App. DB, infrastructure and hosting was all done with Google Firebase. The app allows users to view food items at all times and can be personalized to remind them of when food is about to expire.

# How it works?

After grocery shopping, users input their items into the app. Simply type in a food product, a drop down will populate with commonly purchased items, and the expiration will automatically be calculated for the user.

# Features

Repository of all groceries,  
current and past

Set expirations for groceries.

Set reminders

Automatic push notifications  
for food expiring.

Store photos of all receipts

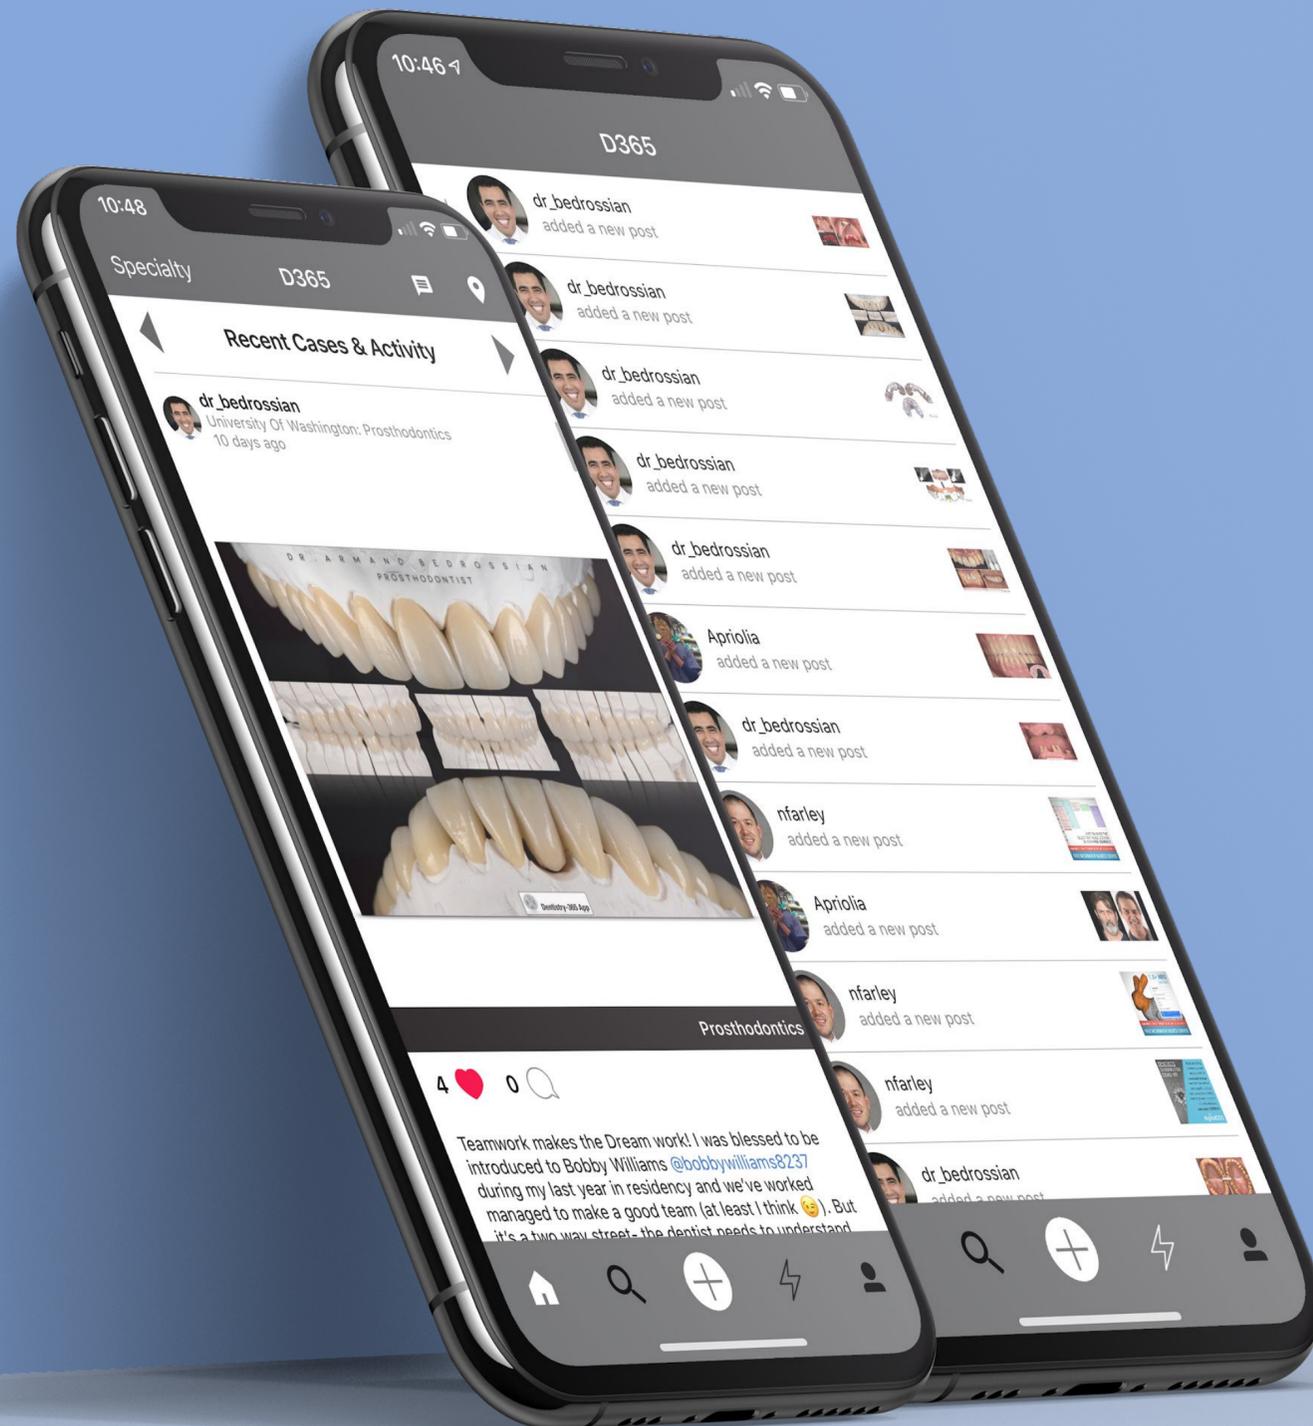

# D365

Hi Dev designed and developed D365 for iOS and Android. The app is a LinkedIn / Instagram for Dentists to collaborate, showcase their work, share methodology and connect with other local dentists around them.

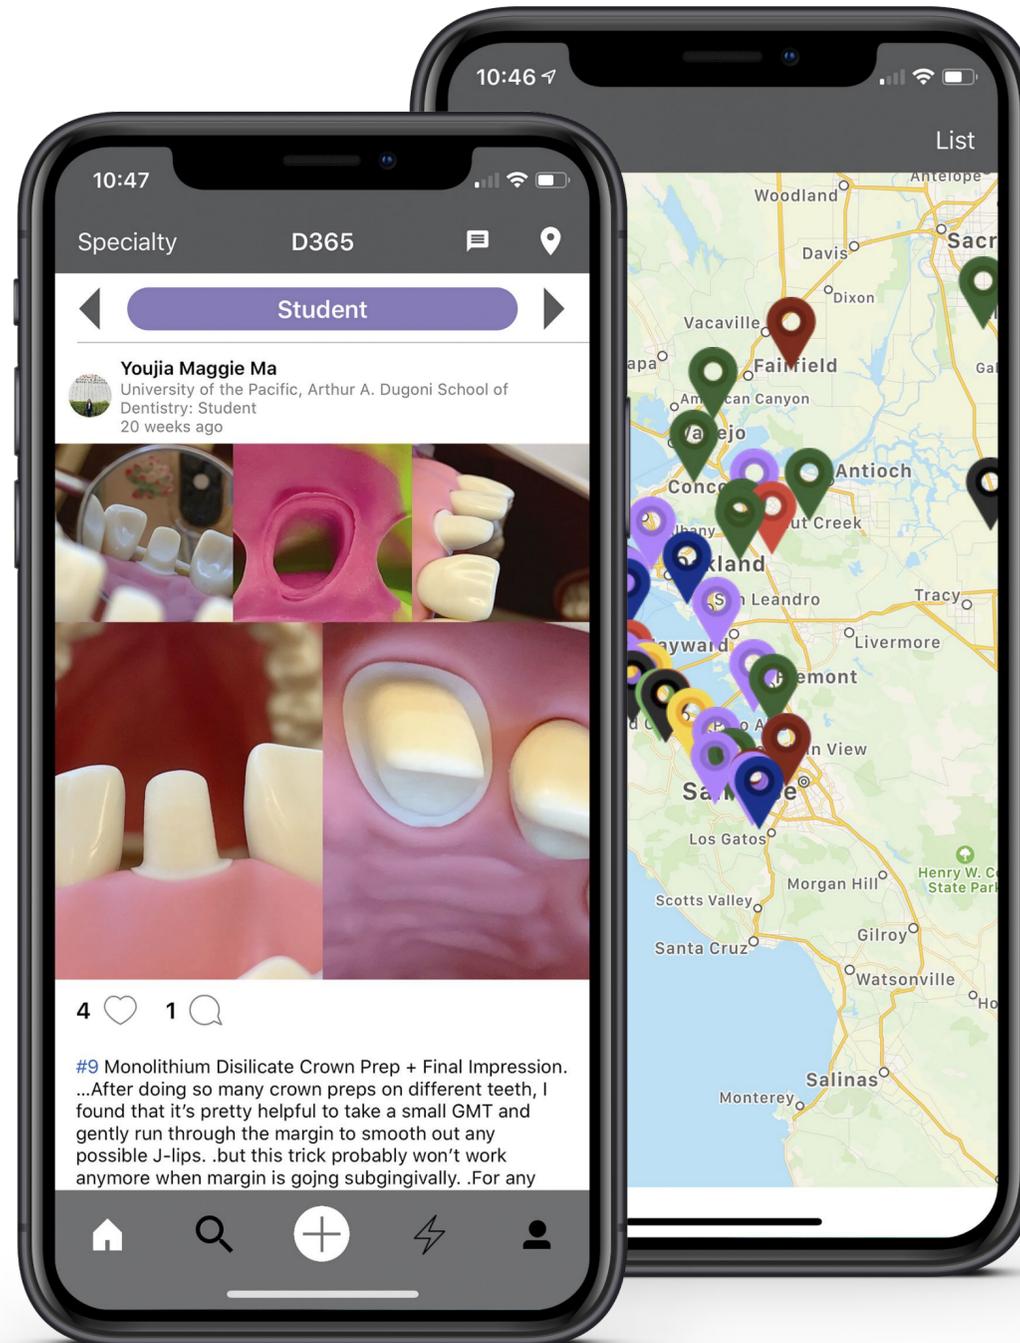

# How it works?

The app includes many features such as liking and commenting on posts, private messaging, map functionality for finding other local dentists around them, activity monitoring, and most important, the ability to upload and document their work.

# Features

Post and share your work just like Instagram.

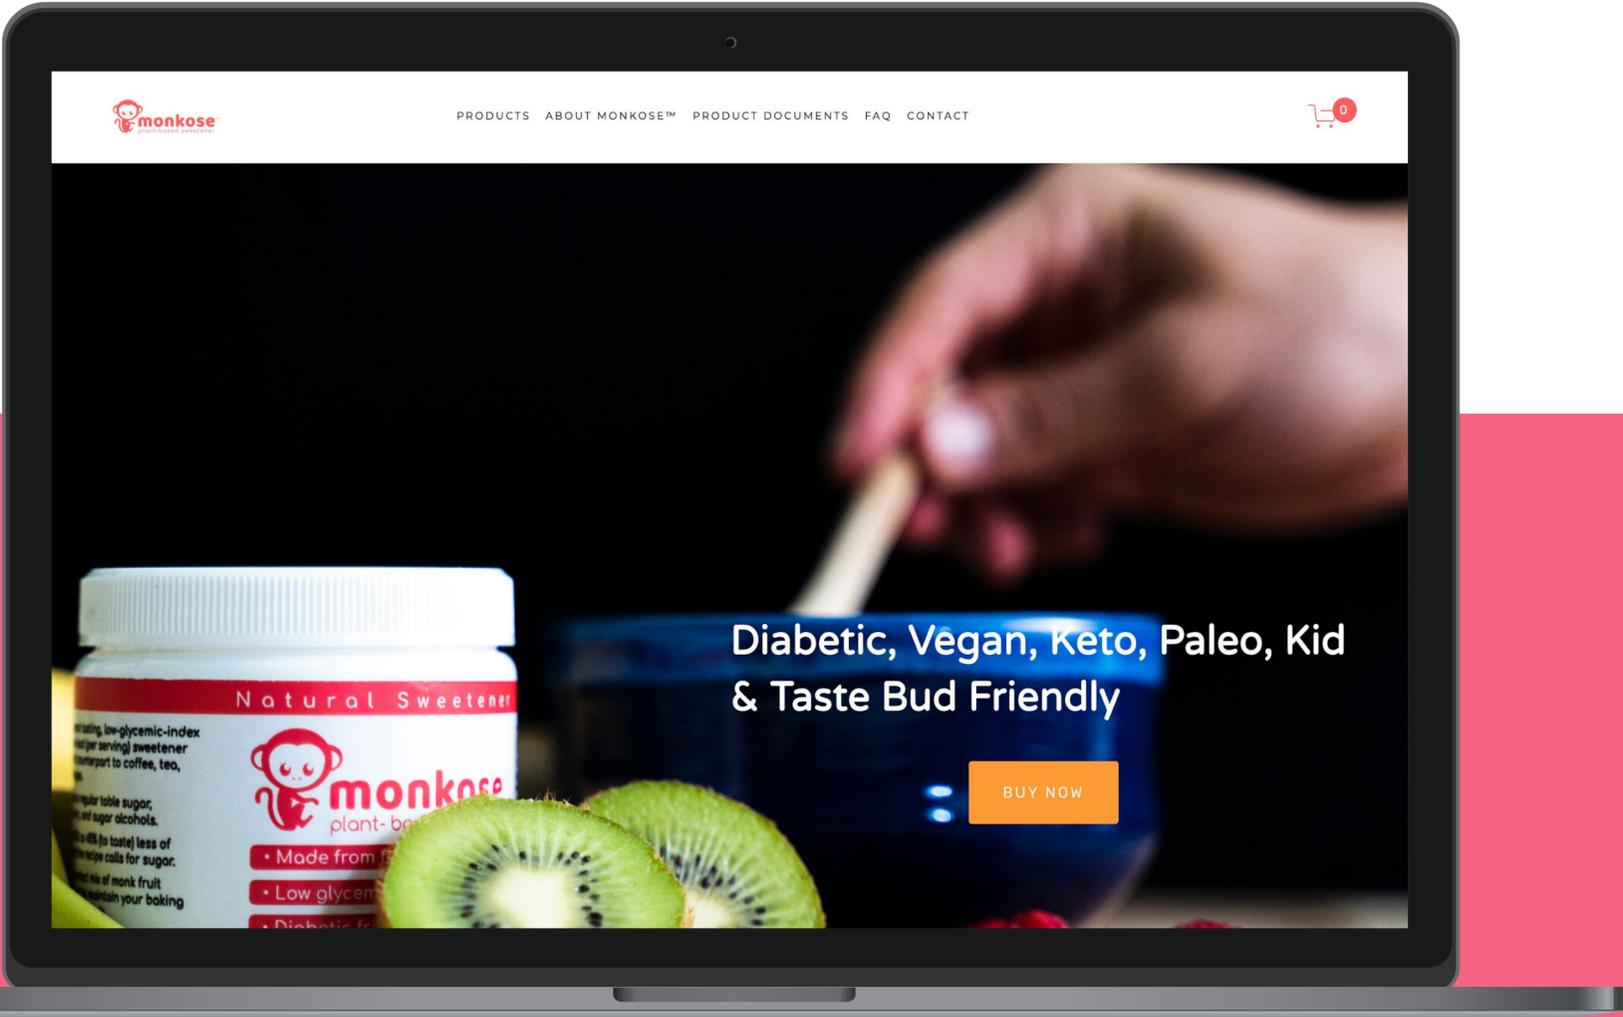

Find and connect with local dentists on the map.

# Monkose

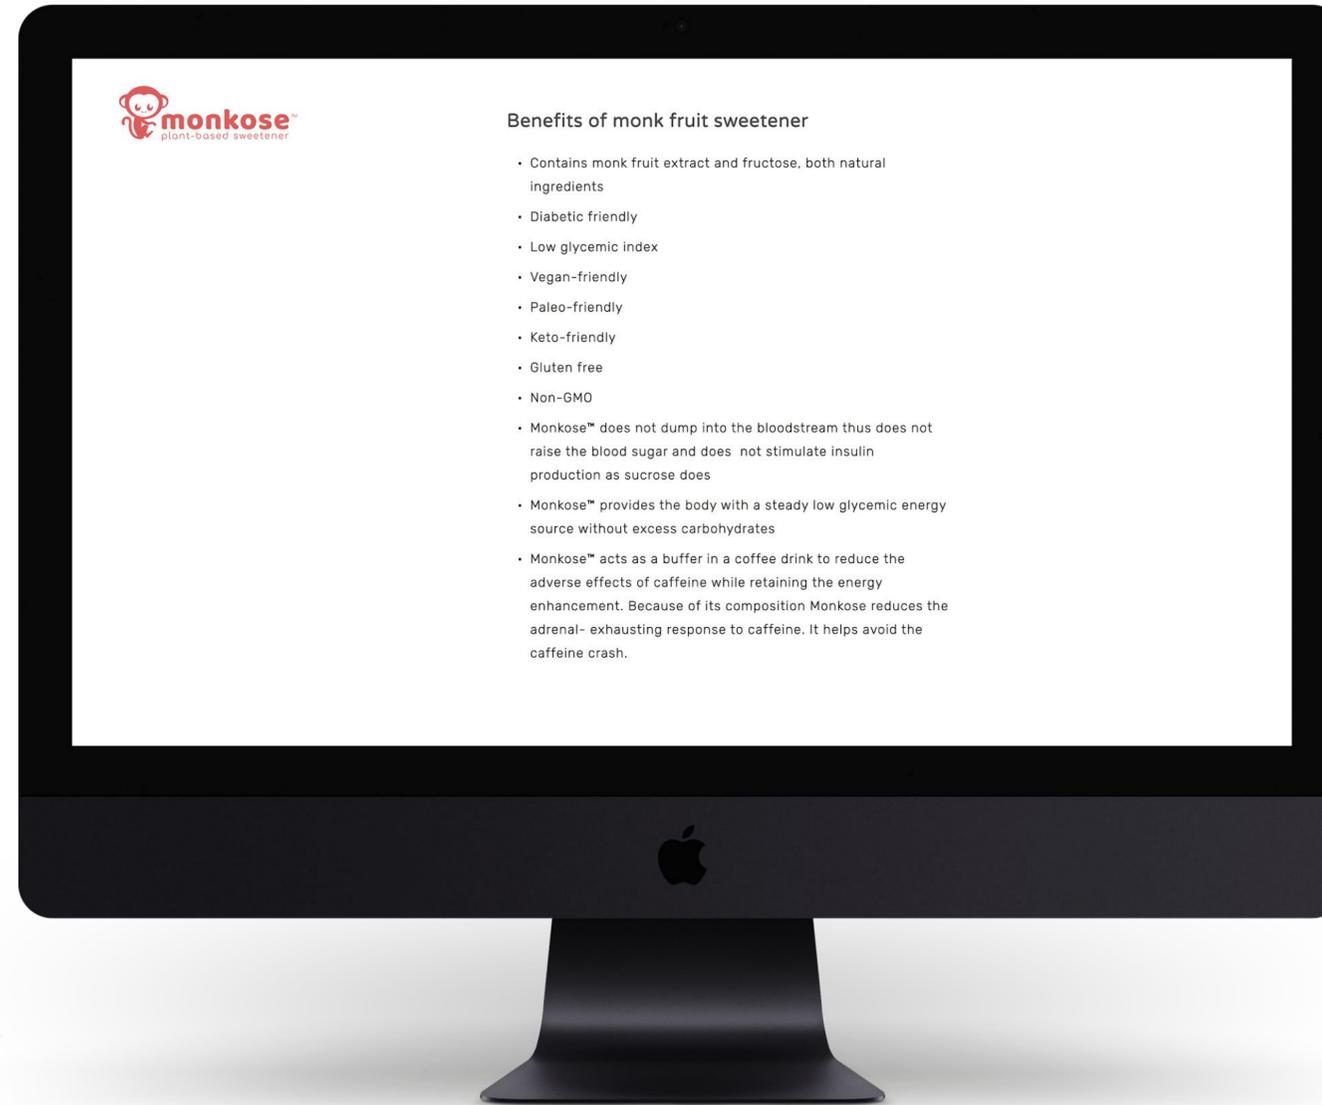

Hi Dev designed the logo, brand, package and website. We built the website using squarespace and developed a custom integration to streamline the shipping process and to manage all purchases in one place.

# Features

**Custom Package Design.**

**E- Commerce.**

**CRM Tool.**

**CMS for the website.**

# Booksmart

Hi Dev designed the logo, brand and all the UI/UX. We built native iOS and Android apps, the website and mobile web app. We pull data from over 10,000,000 books worldwide.

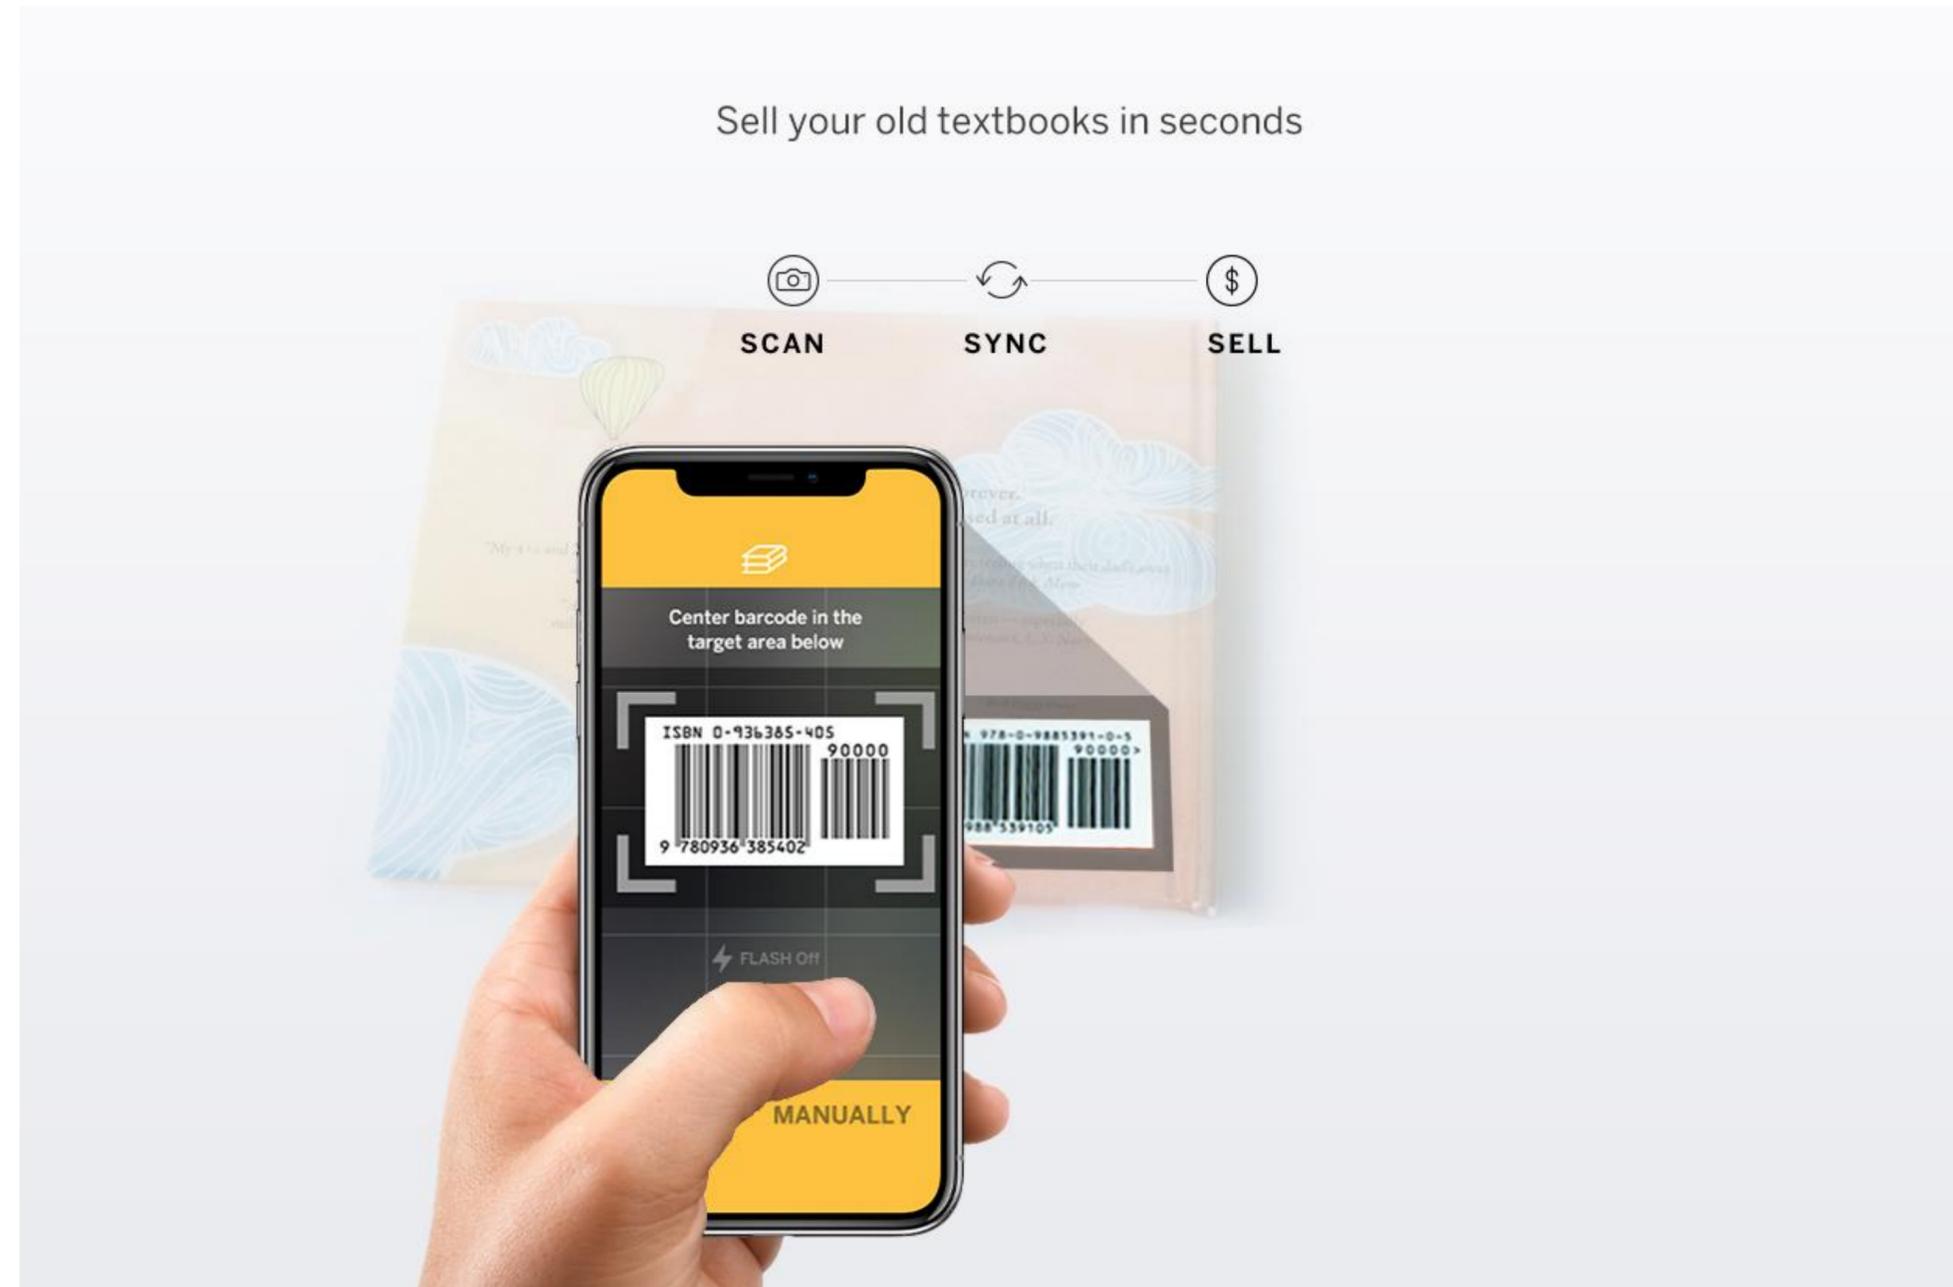

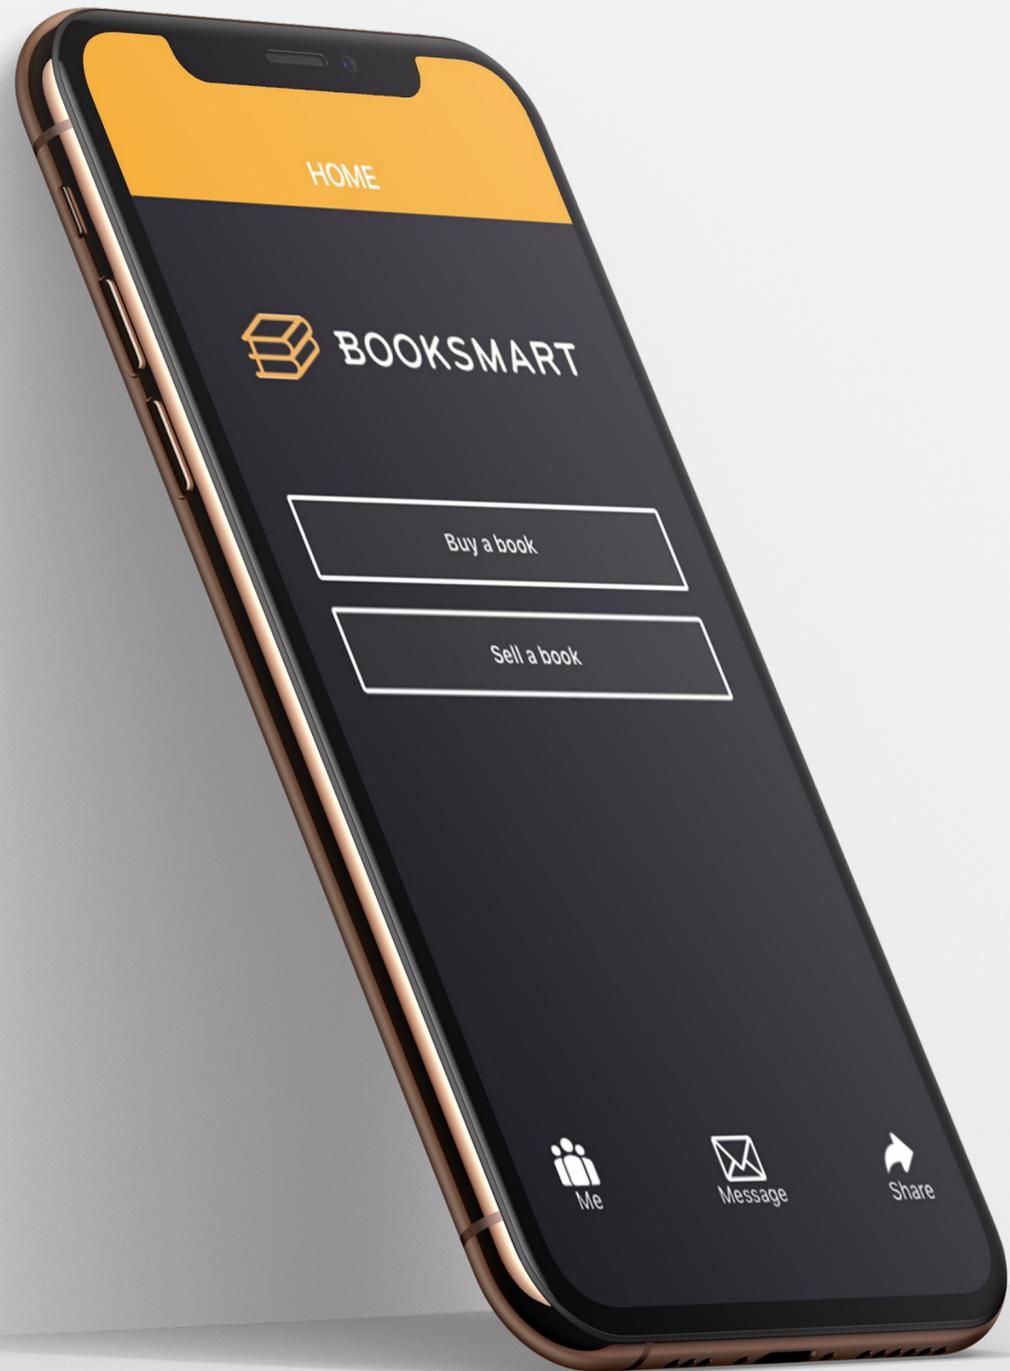

# How it works

Upload textbooks for sale in seconds

Compare prices from students on campus and the best online prices for new, used, rental and e-textbooks

Direct message students on campus to meet and transact

# More about Booksmart

Giving students access to local marketplaces builds a sense of community on their campuses.

Booksmart is designed to help students manage their textbook libraries and be more efficient with buying and selling their used textbooks.

# LotoLabs

Hi Dev built the native iOS and Android apps for LotoLabs. We connected the apps with the “Legend” firmware to control the temperature, color and settings of the hardware device. We used Bluetooth LE technology.

# How it works?

LotoLabs has a patented magnetic heat induction coil inside their vaporizer which is controlled by the mobile applications we built.

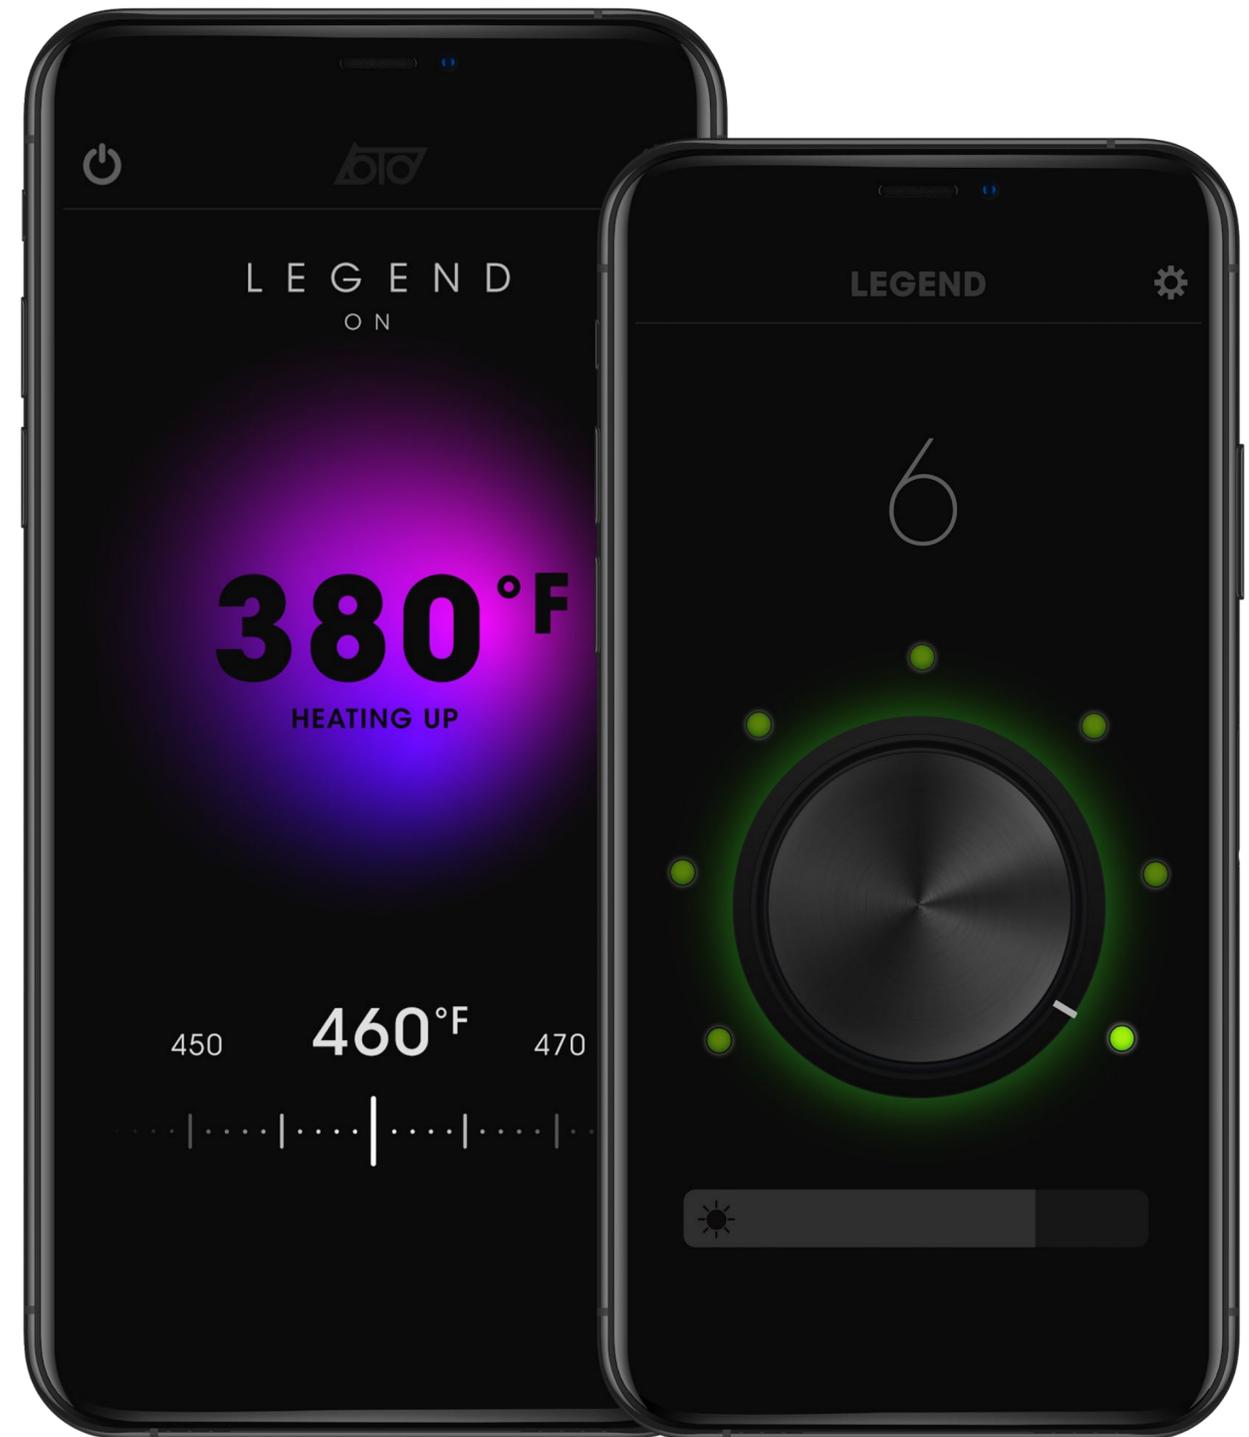

We use Bluetooth LE and their firmware to connect & control the device.

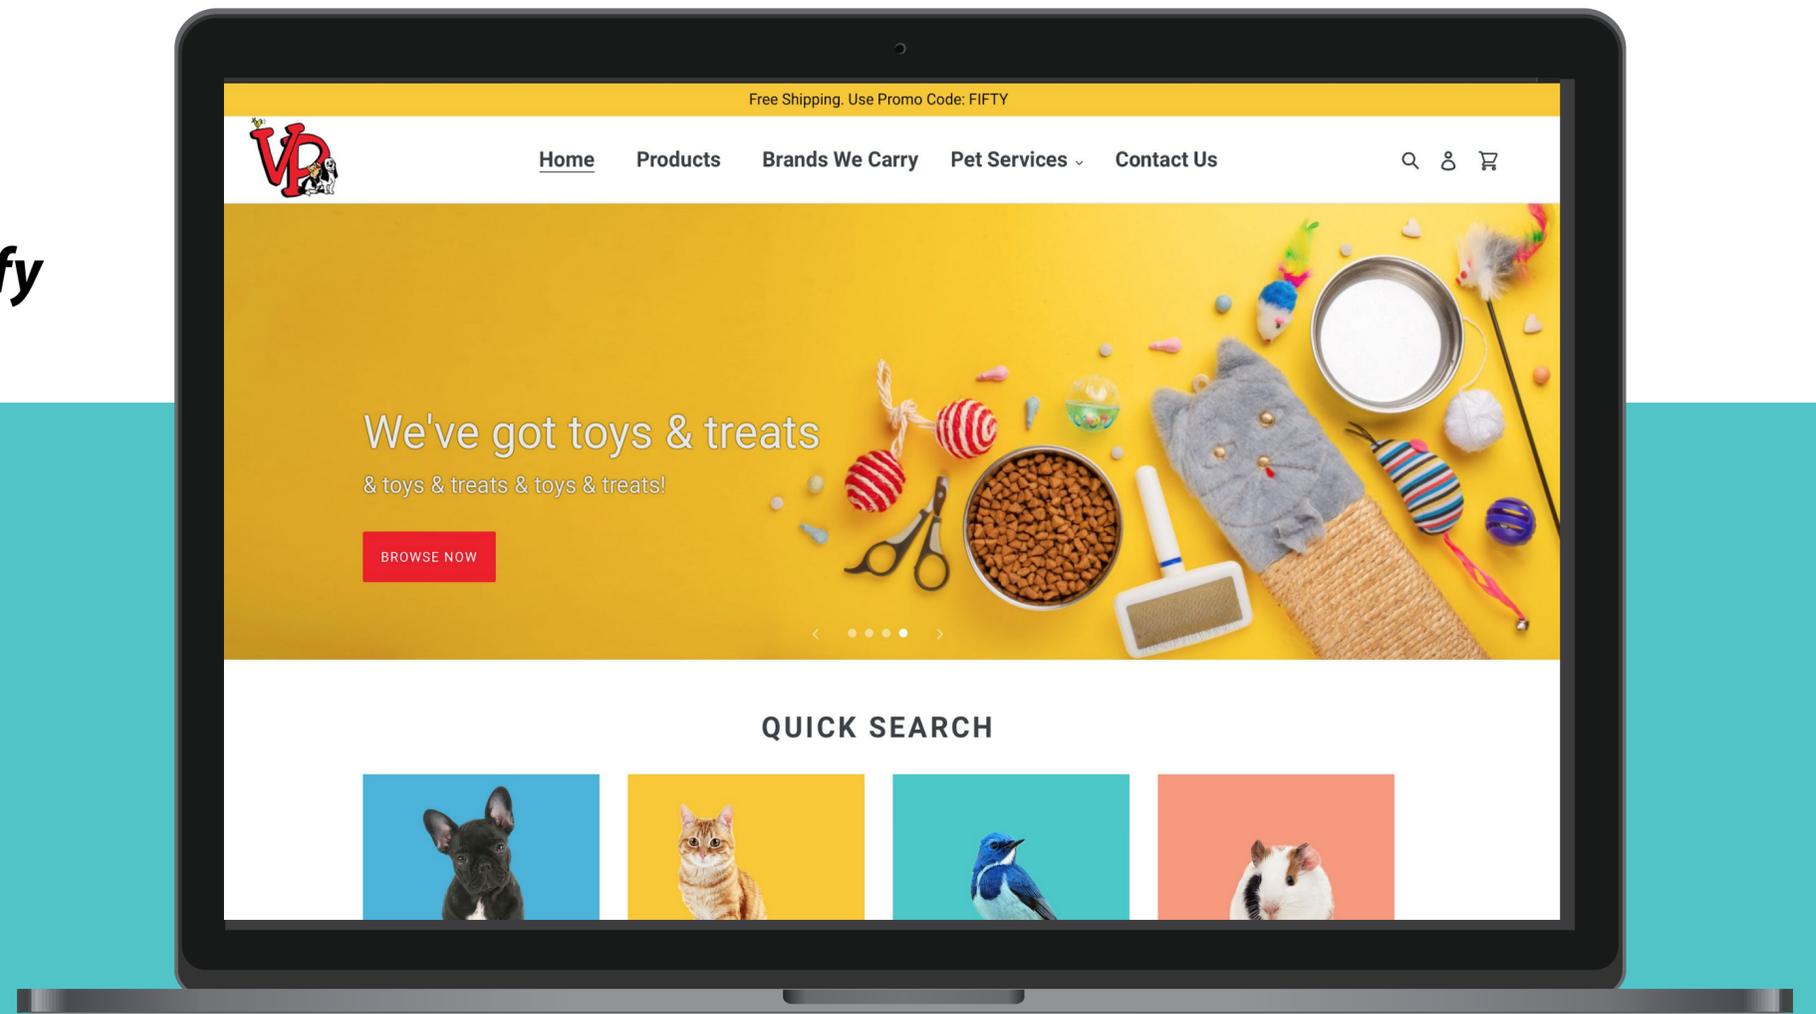

# Front End Development

LotoLabs has a sleek, sexy design and we were sure to implement it exactly how it was designed to be for both iOS and Android.

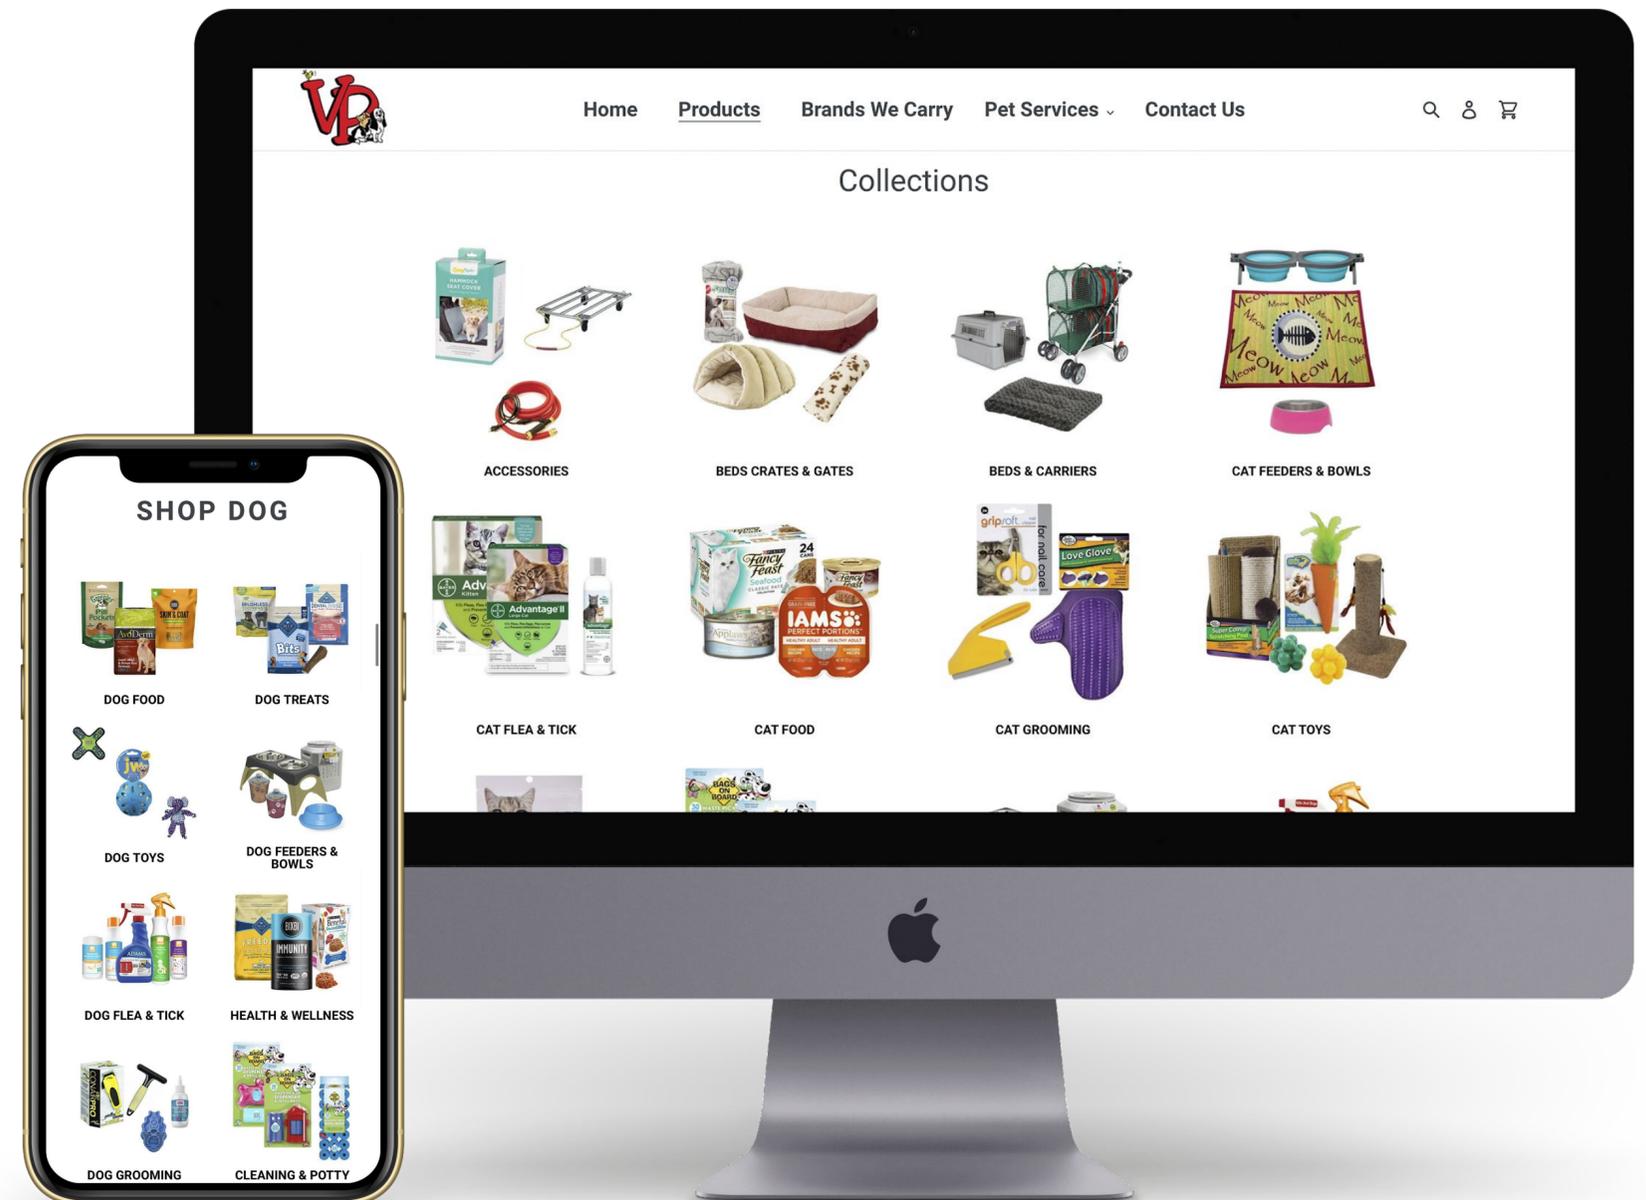

# Village Pets & Supplies

Hi Dev designed and built the e-commerce pet store website. We used Shopify and developed custom integrations with Endless Aisle and NewCo to pull over 18,000 pet related products into the website catalogue.

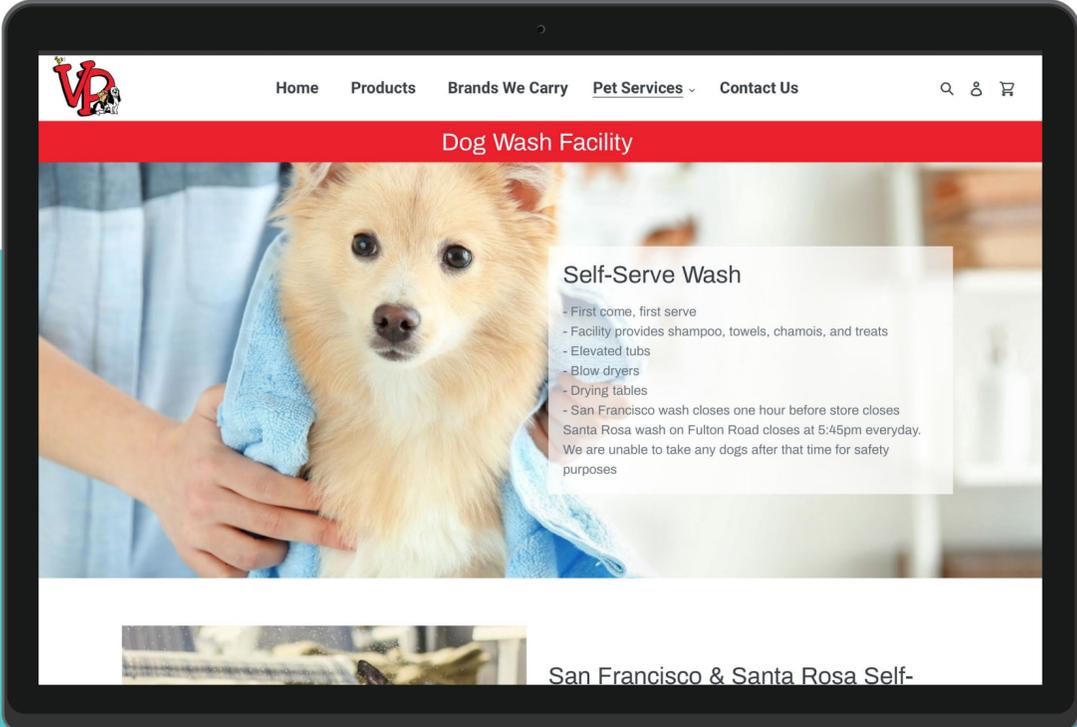

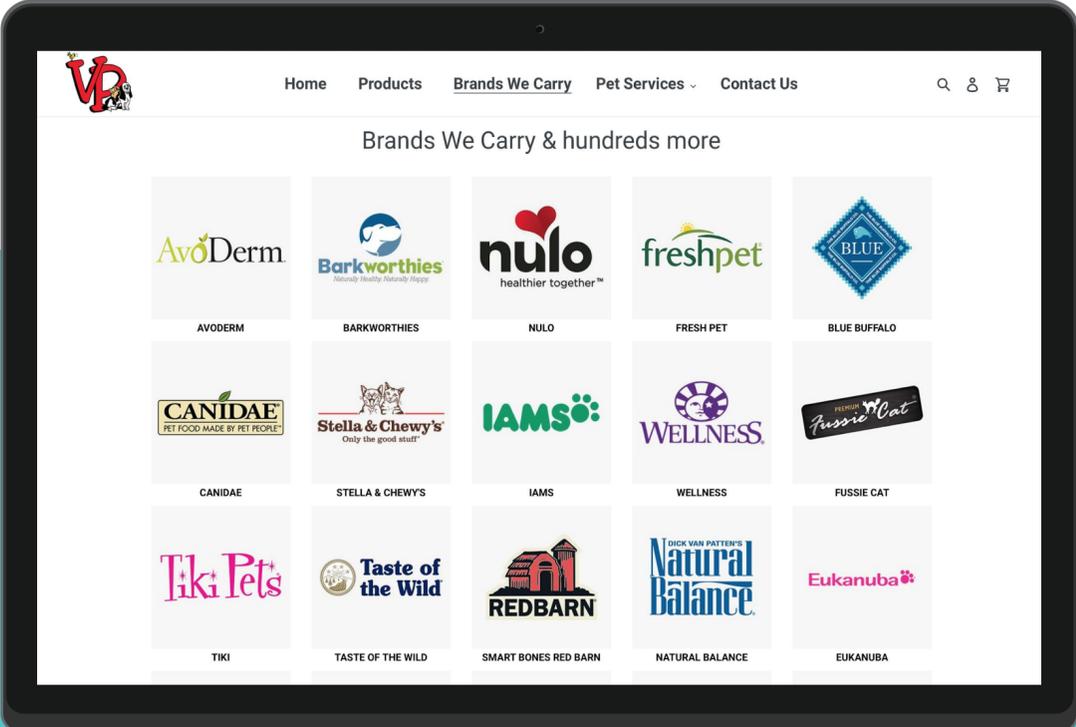

# Fast Development to adapt to COVID-19

They currently have three store locations in San Francisco and Santa Rosa. Due to COVID-19, Village Pets wanted to bring their store online and have shipping automated so their customers can order pet products for delivery.

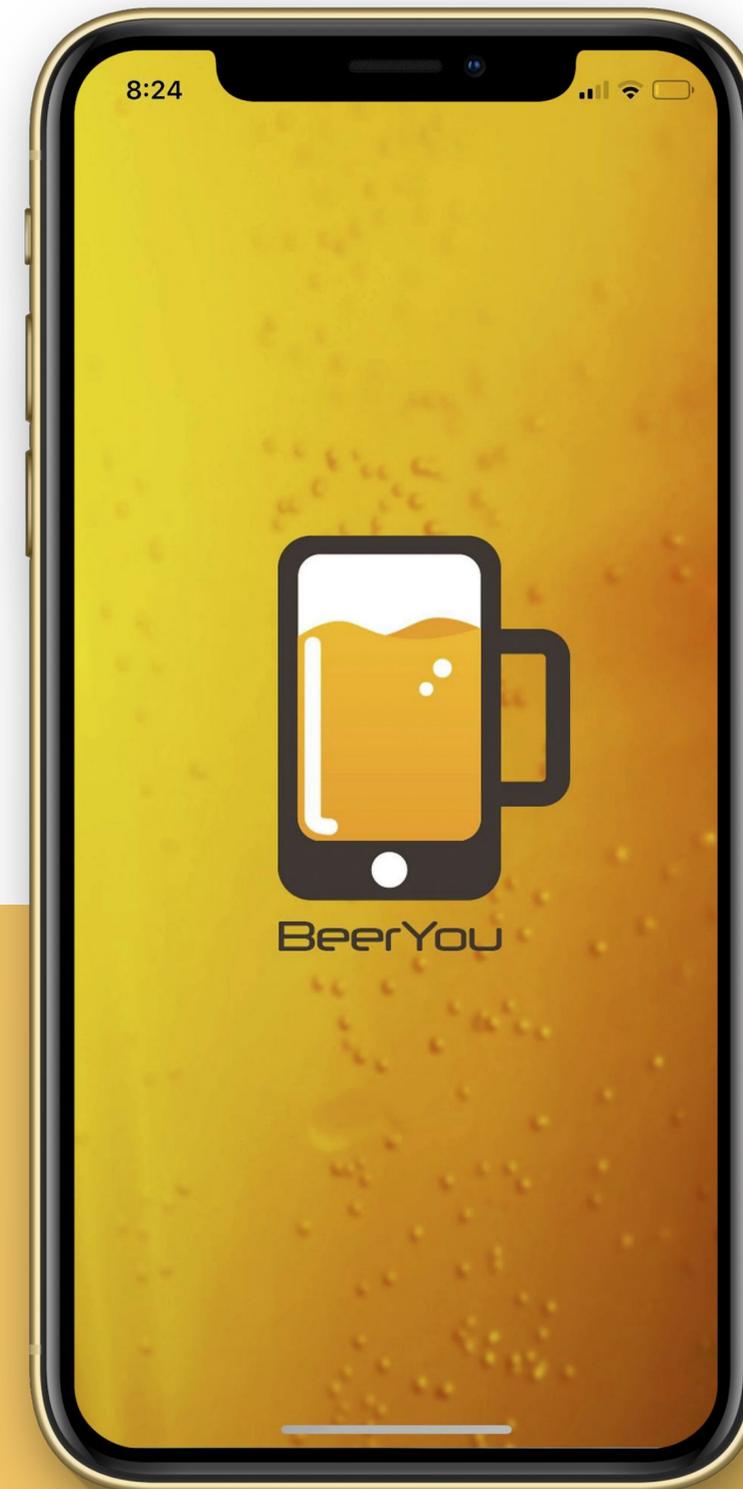

# Over 100 brands integrated into the E-commerce Store

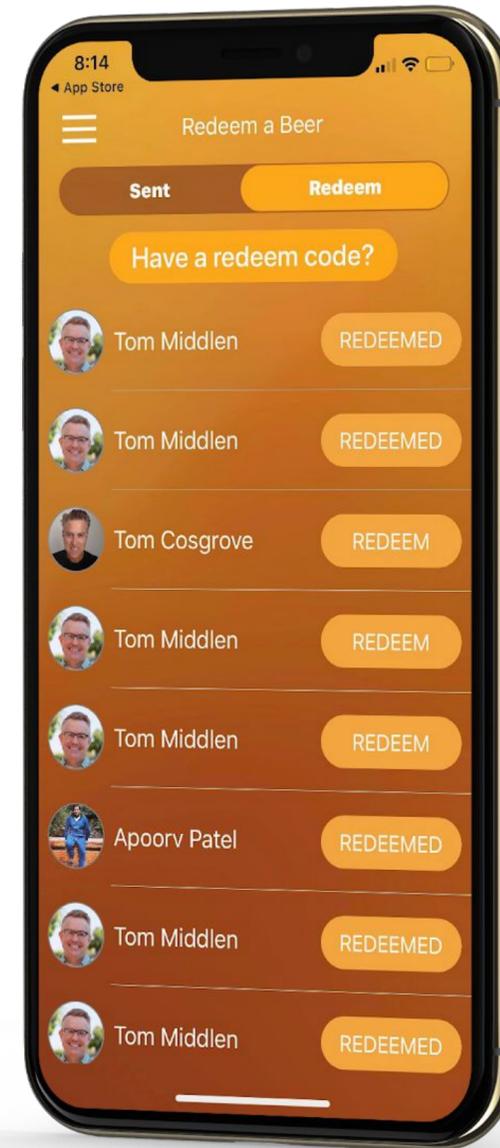

# BeerYou

Hi Dev designed the logo, brand and all the UI/UX. We built native iOS, Android apps and the website. BeerYou is the beer gifting app!

# How it works?

Have a friend or colleague on the other side of the world? The other side of the country? The other side of the bar? Send a beer to them now! Your wonderfully benevolent gift of beer can be redeemed at over 20,000 locations.

# Features

ADD A FRIEND

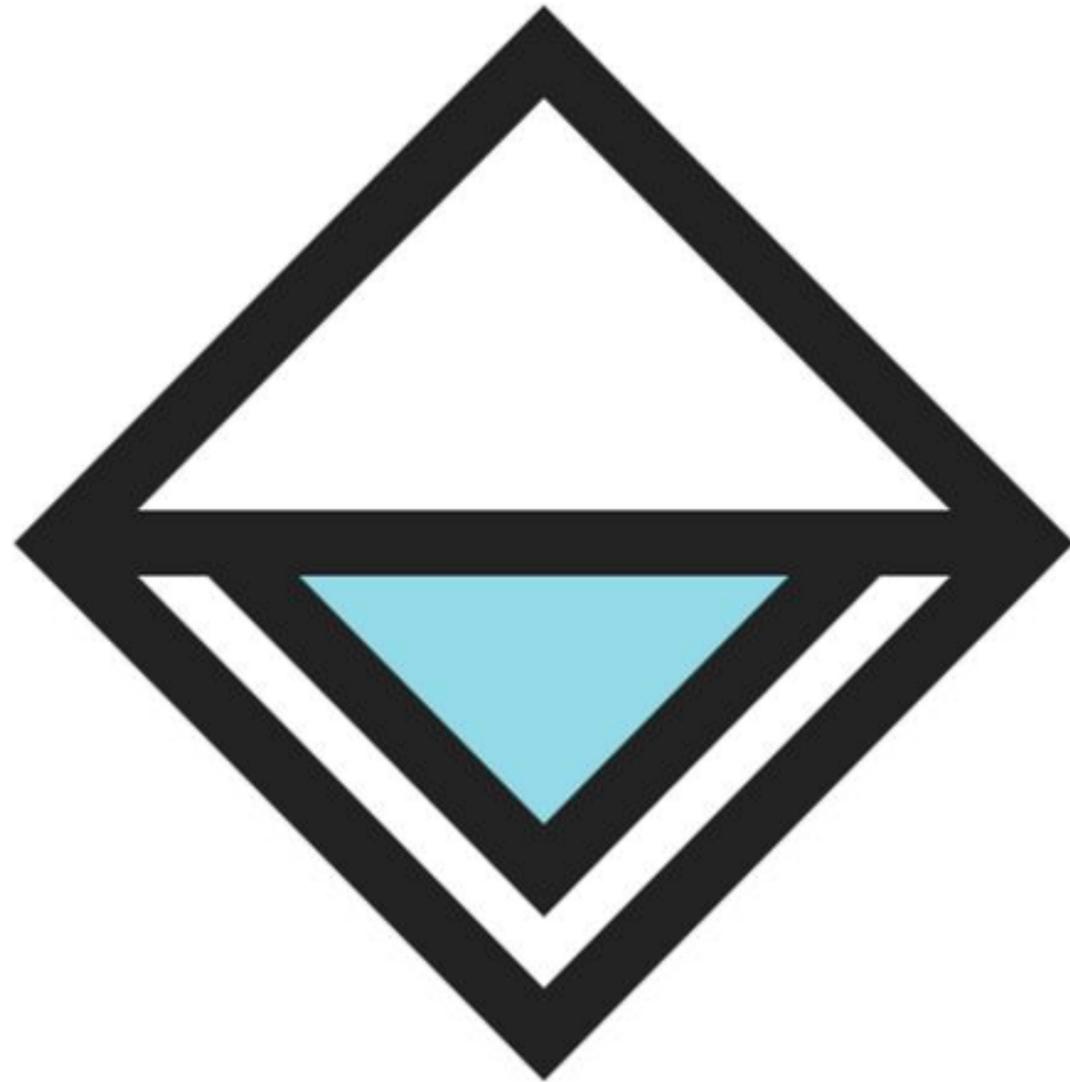

TAP BEER

SEND BEER

BEER DELIVERED

It's that simple.

# CONTACT US

Hi Dev has worked on hundreds of projects related to custom software development, websites, apps, UI/UX and custom design. We showcase some of our work above, but if there is anything specific you want to see or learn more about, contact us.
